

PRIVA-STREAM: Private Collaborative Streaming

Simon Da Silva - Daniel Negru, Laurent Reveillere
PROGRESS - Univ. Bordeaux, LaBRI, France

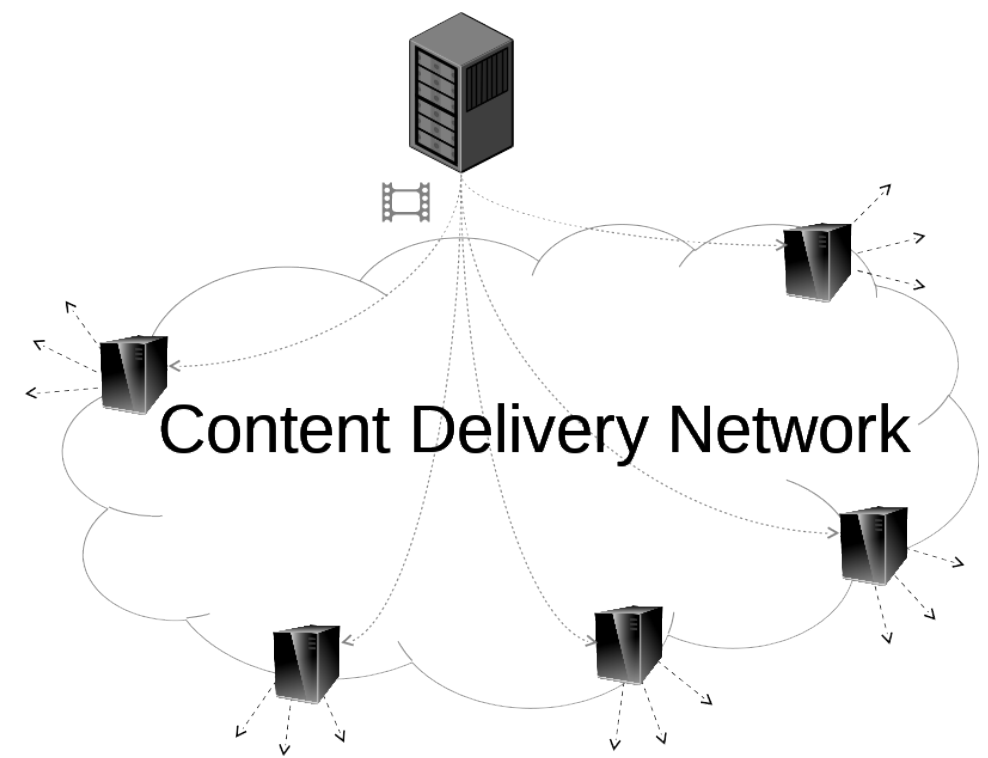

université
de BORDEAUX

Video content consumption

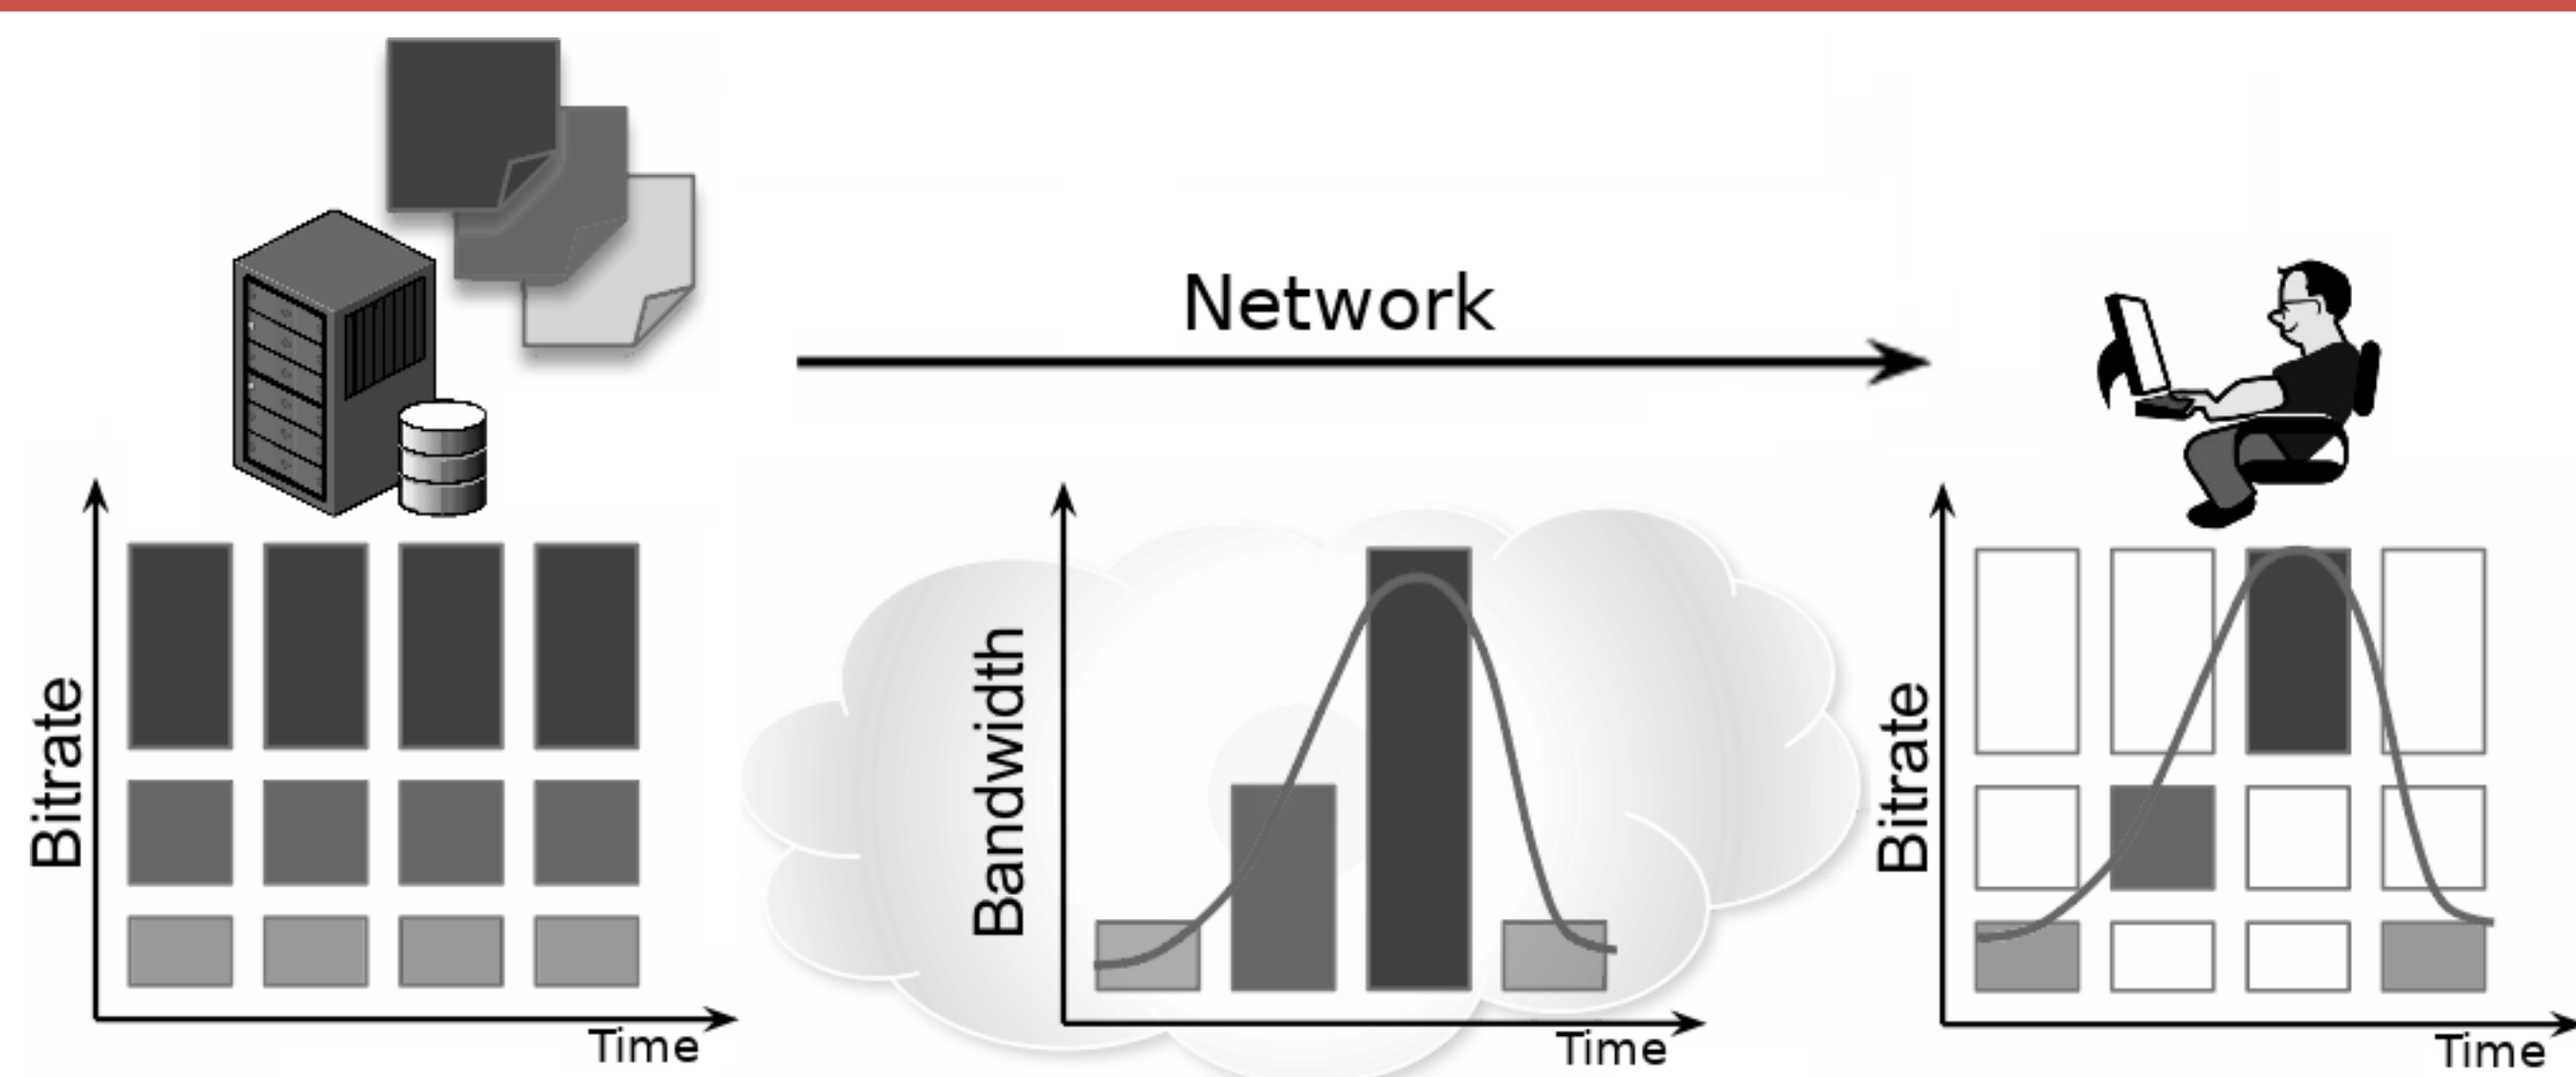

24% CAGR
2016-2021

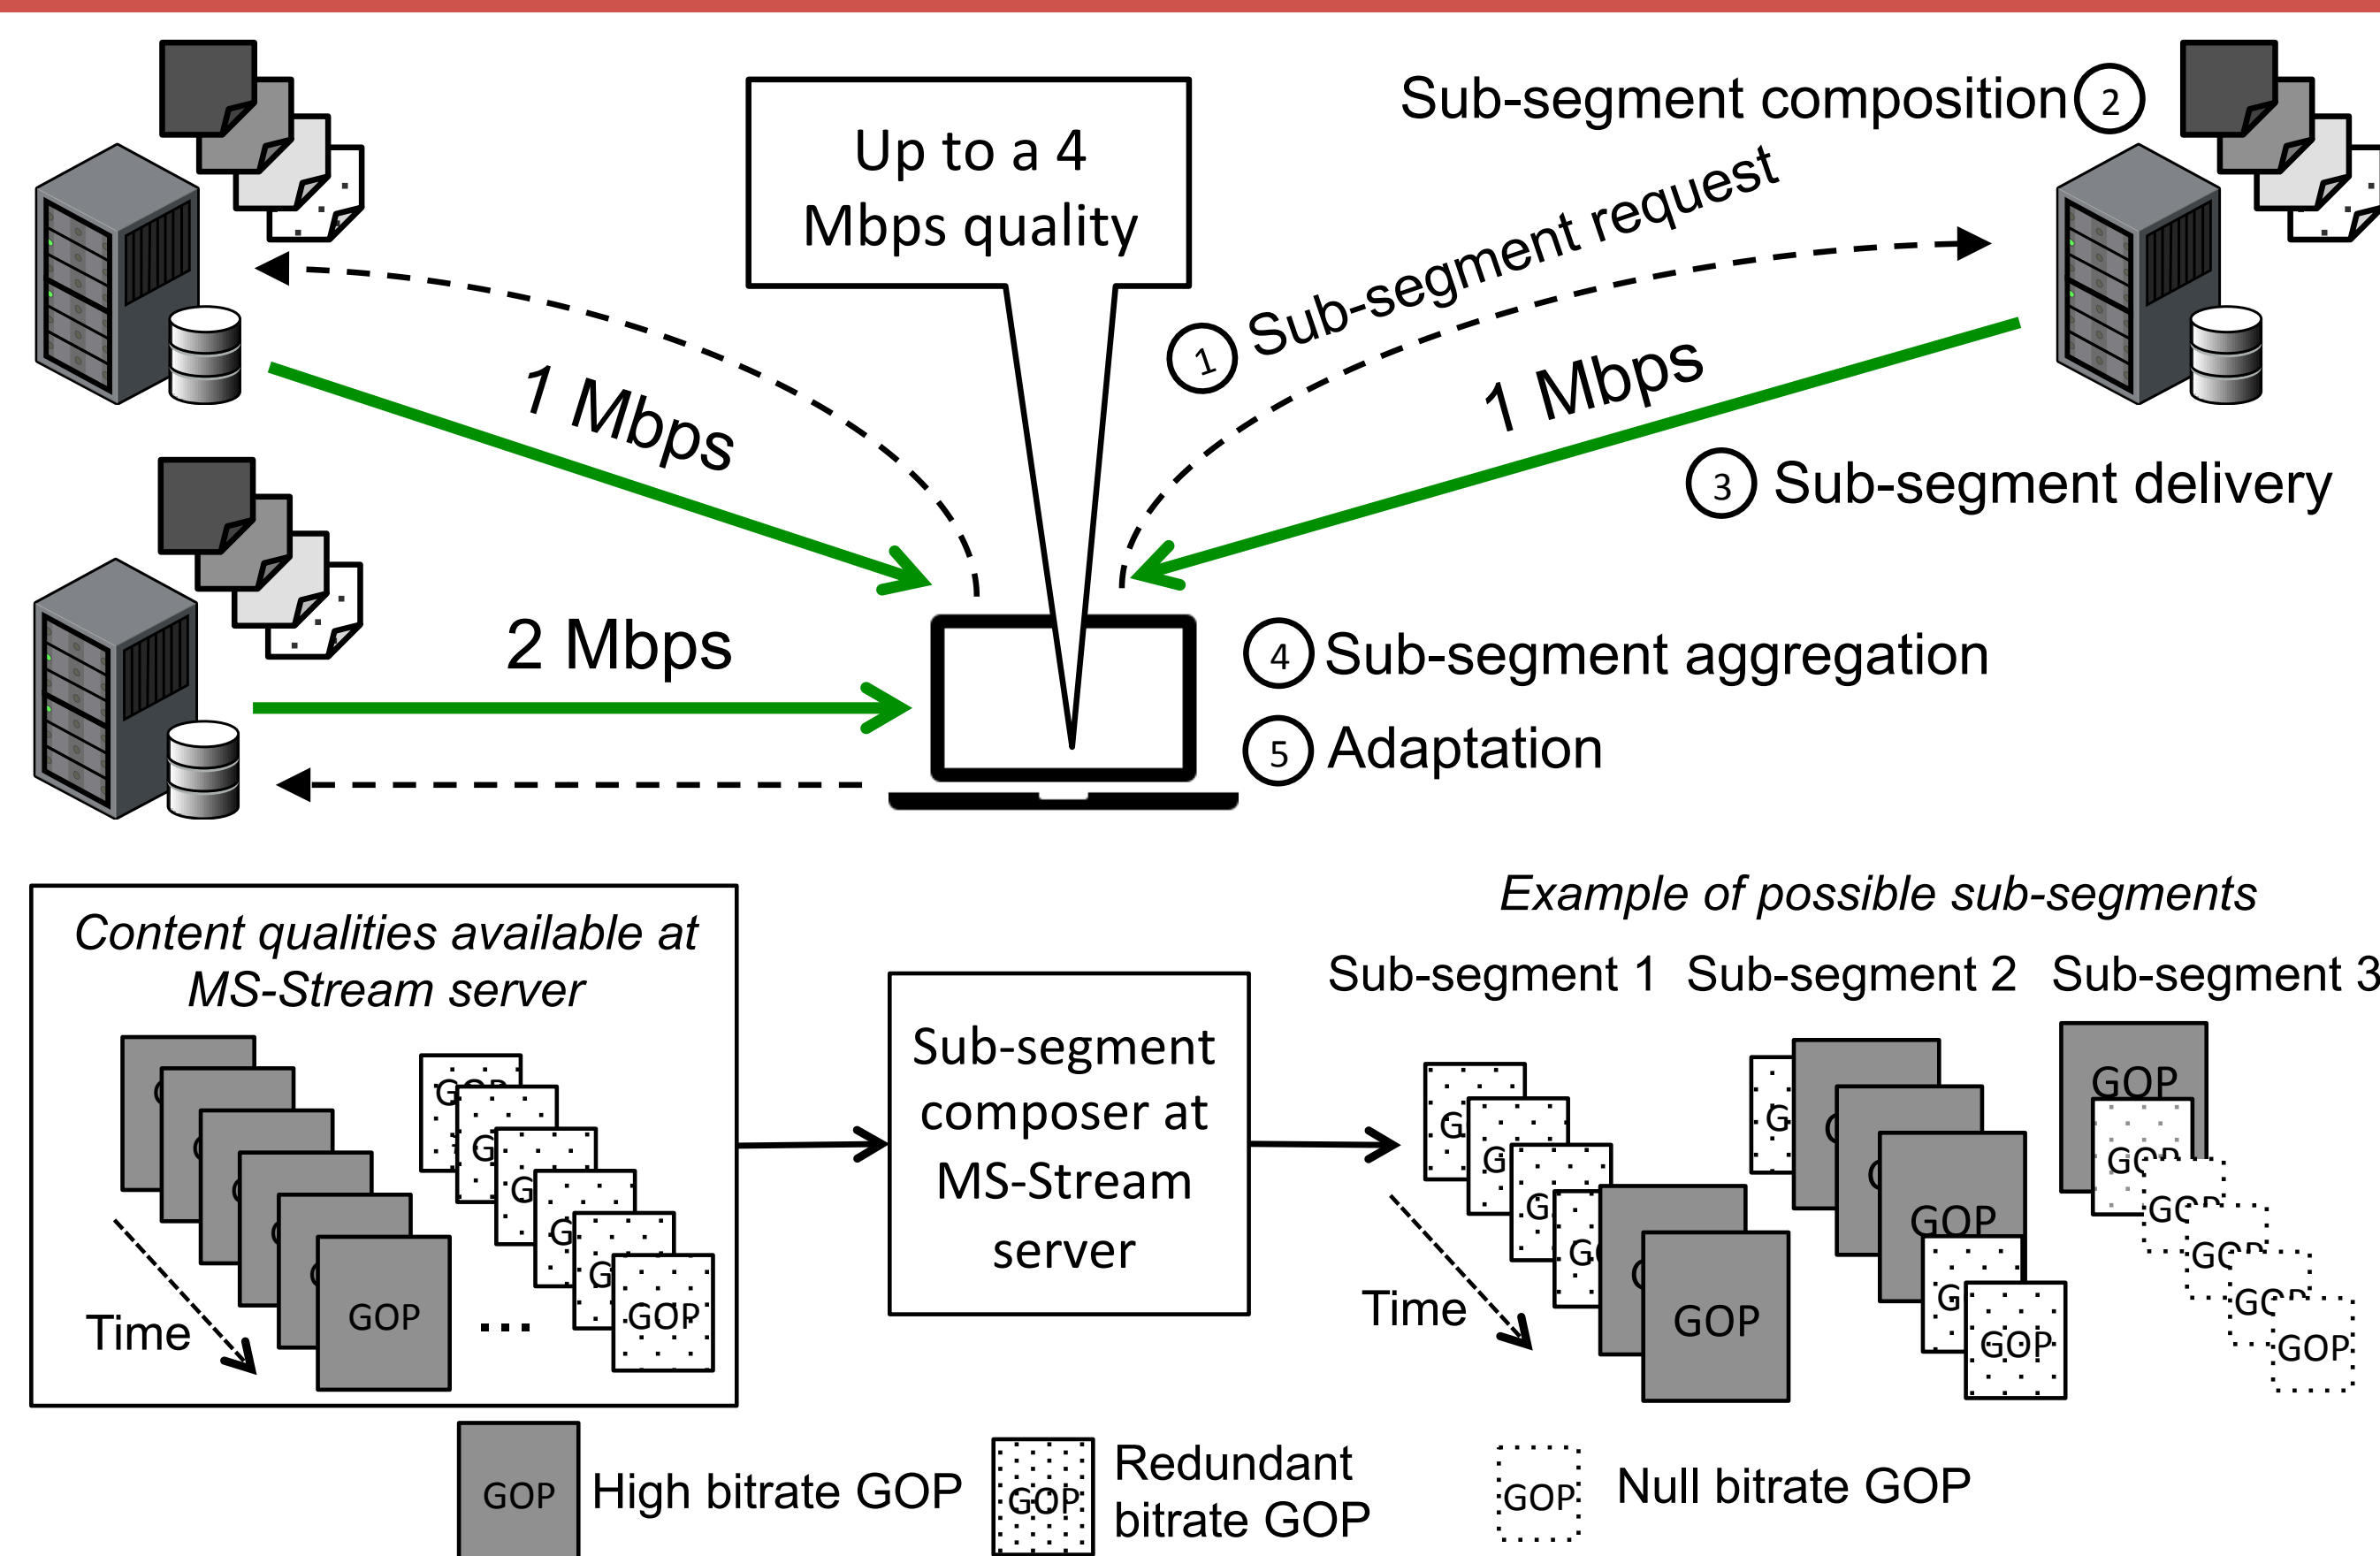

Content Delivery Networks (CDN)

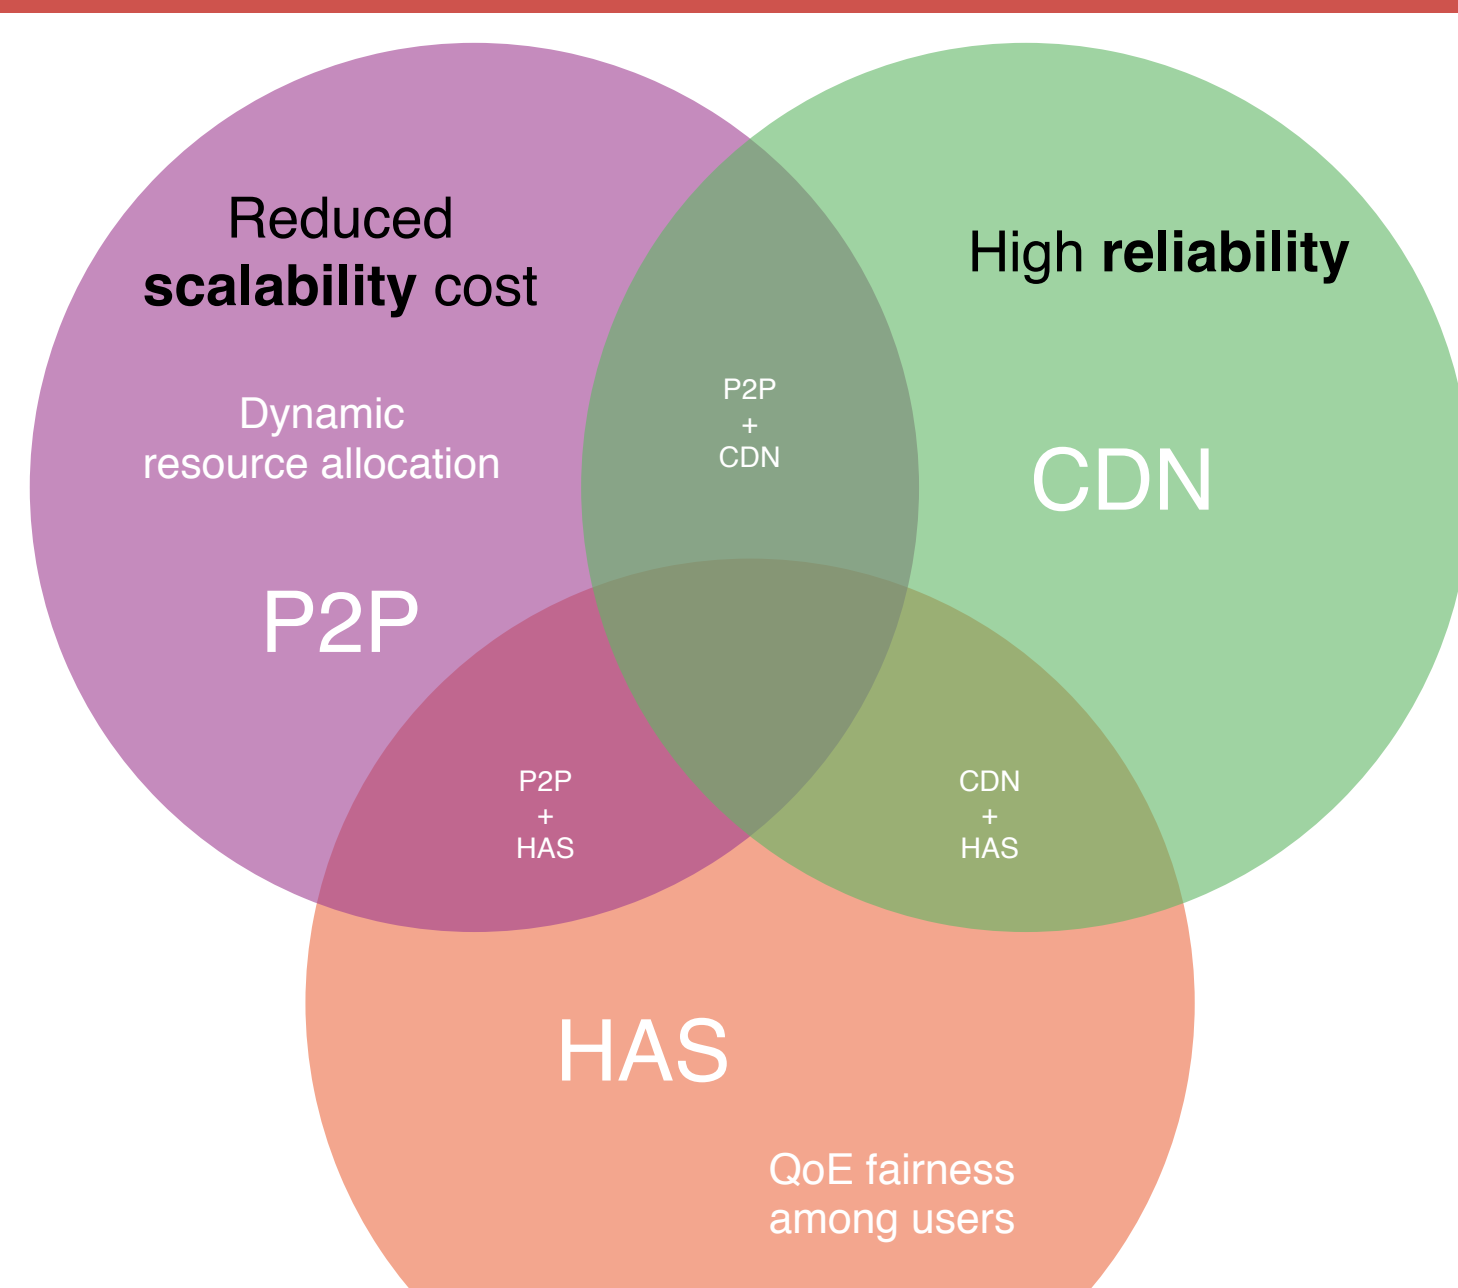

HTTP Adaptive Streaming (HAS)

MS-Stream: Multi-Source Streaming over HTTP

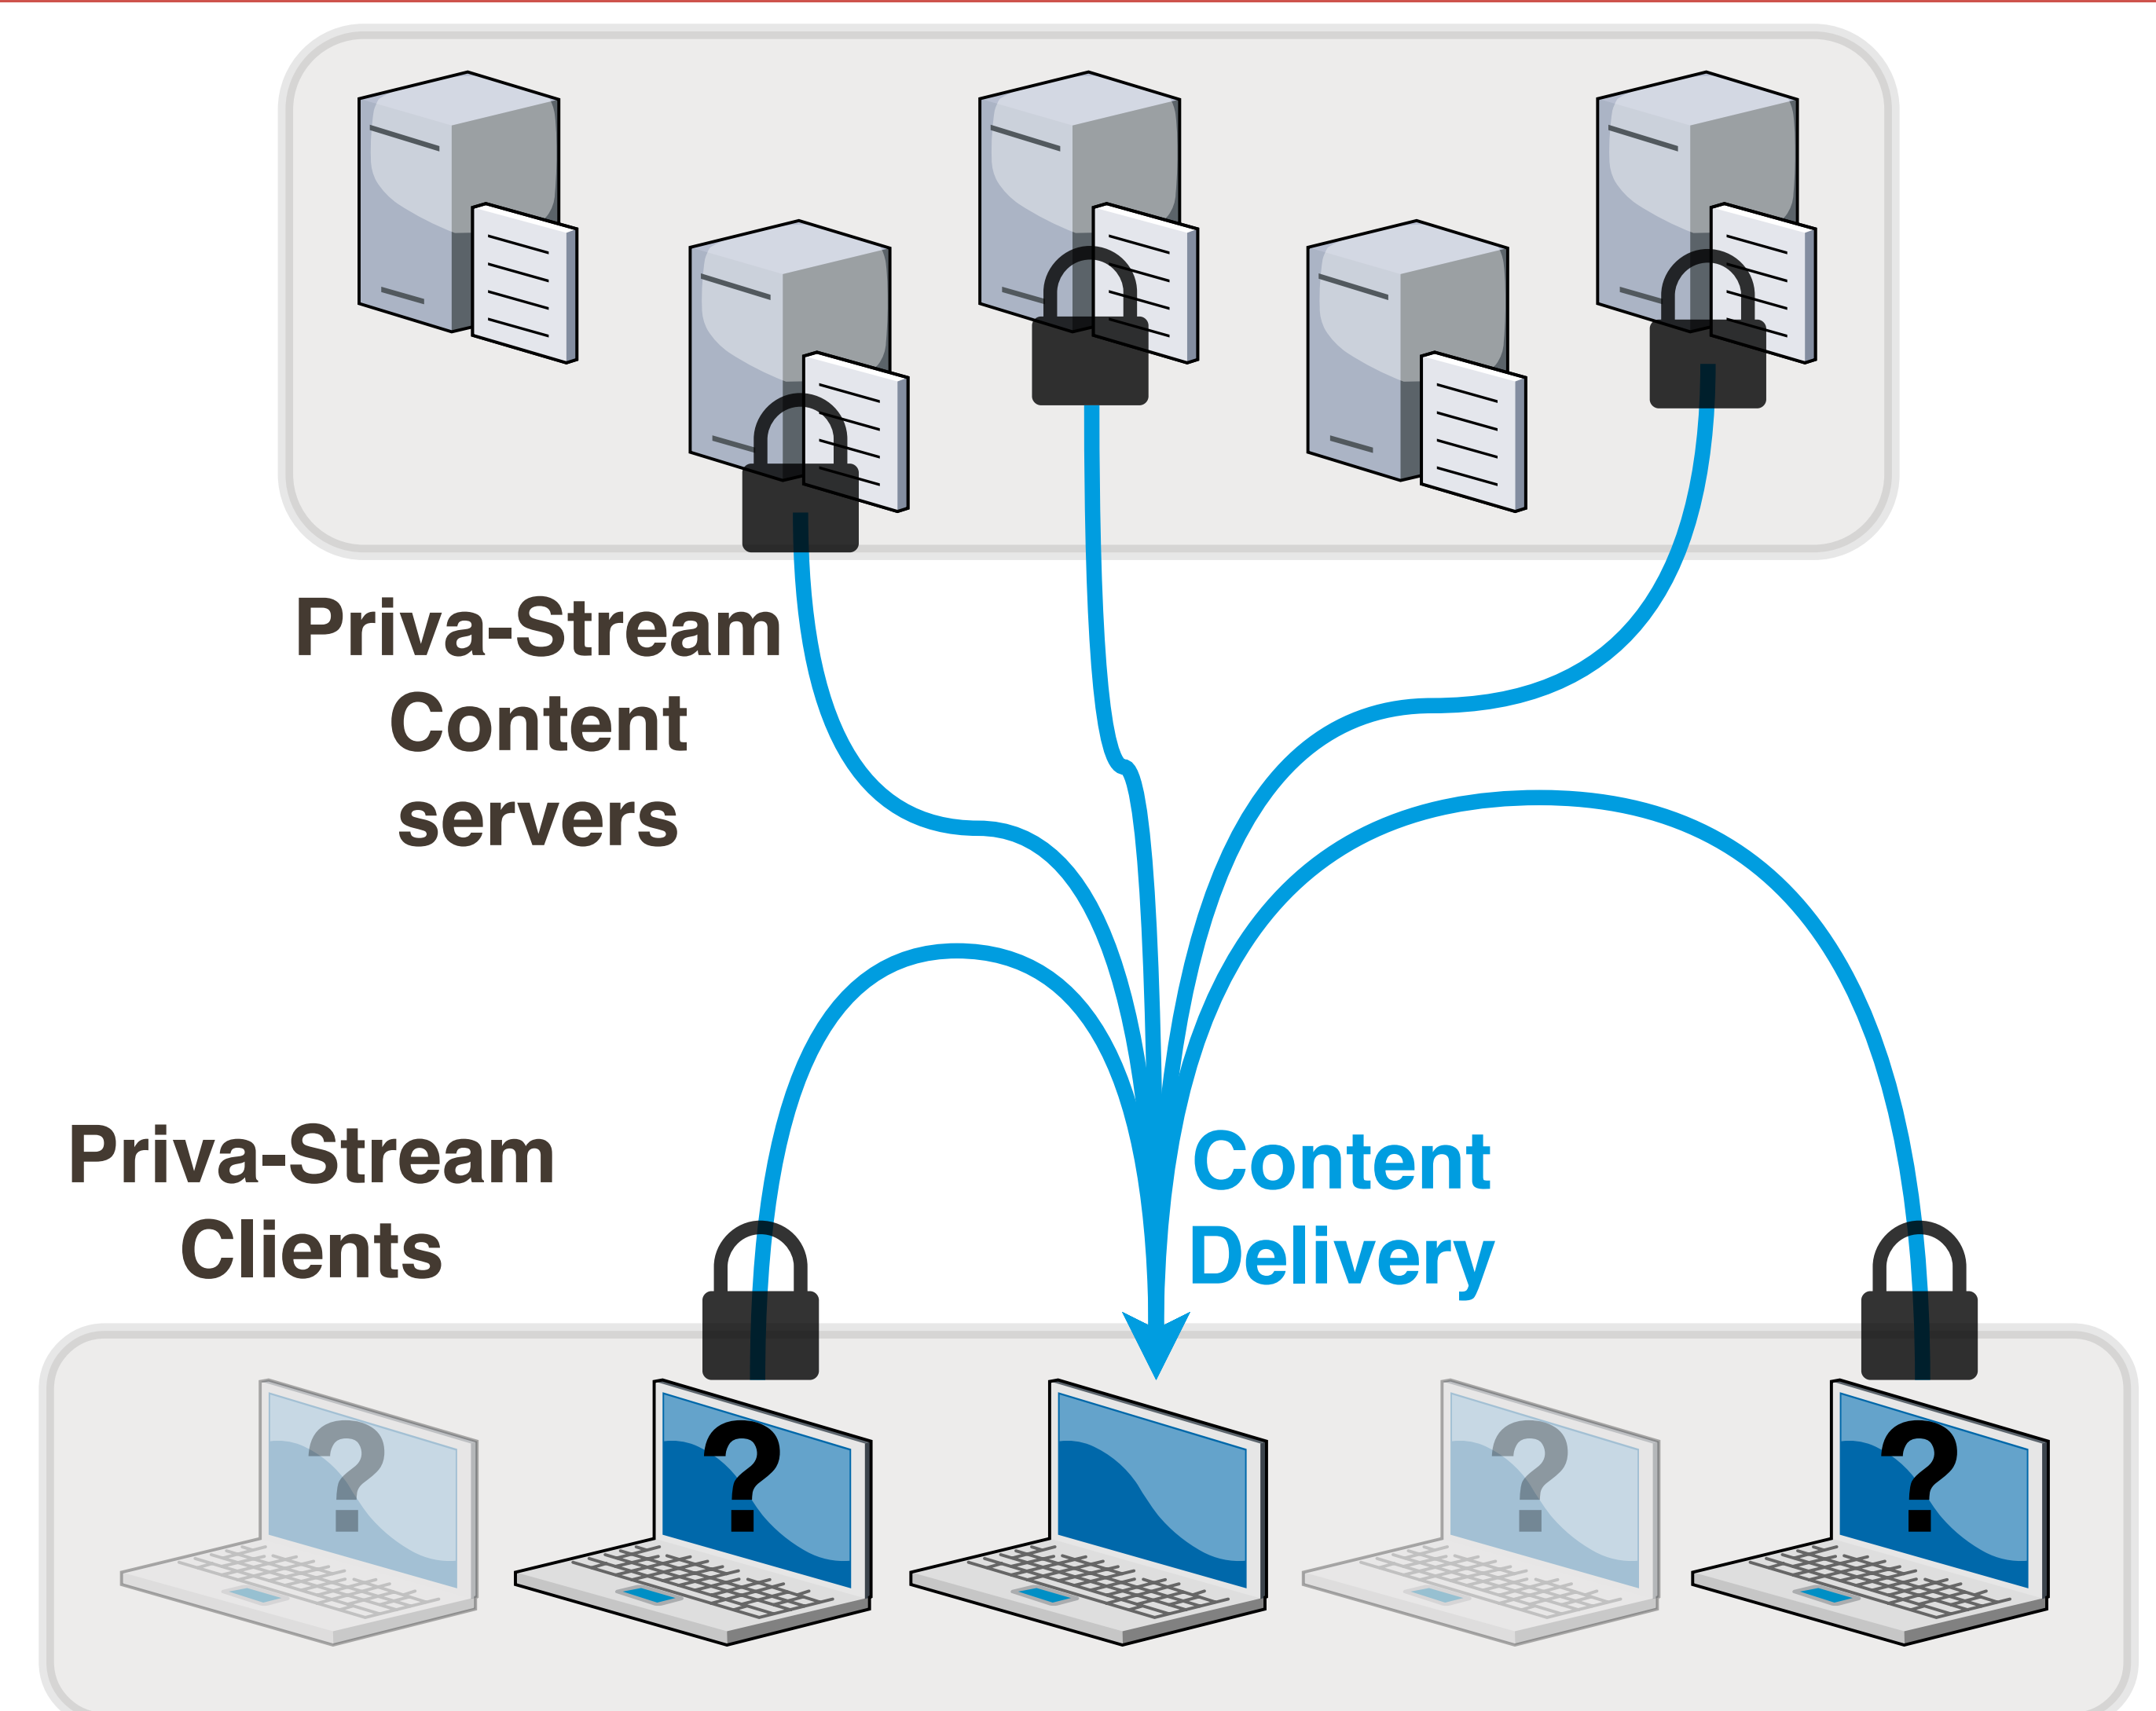

Problem statement

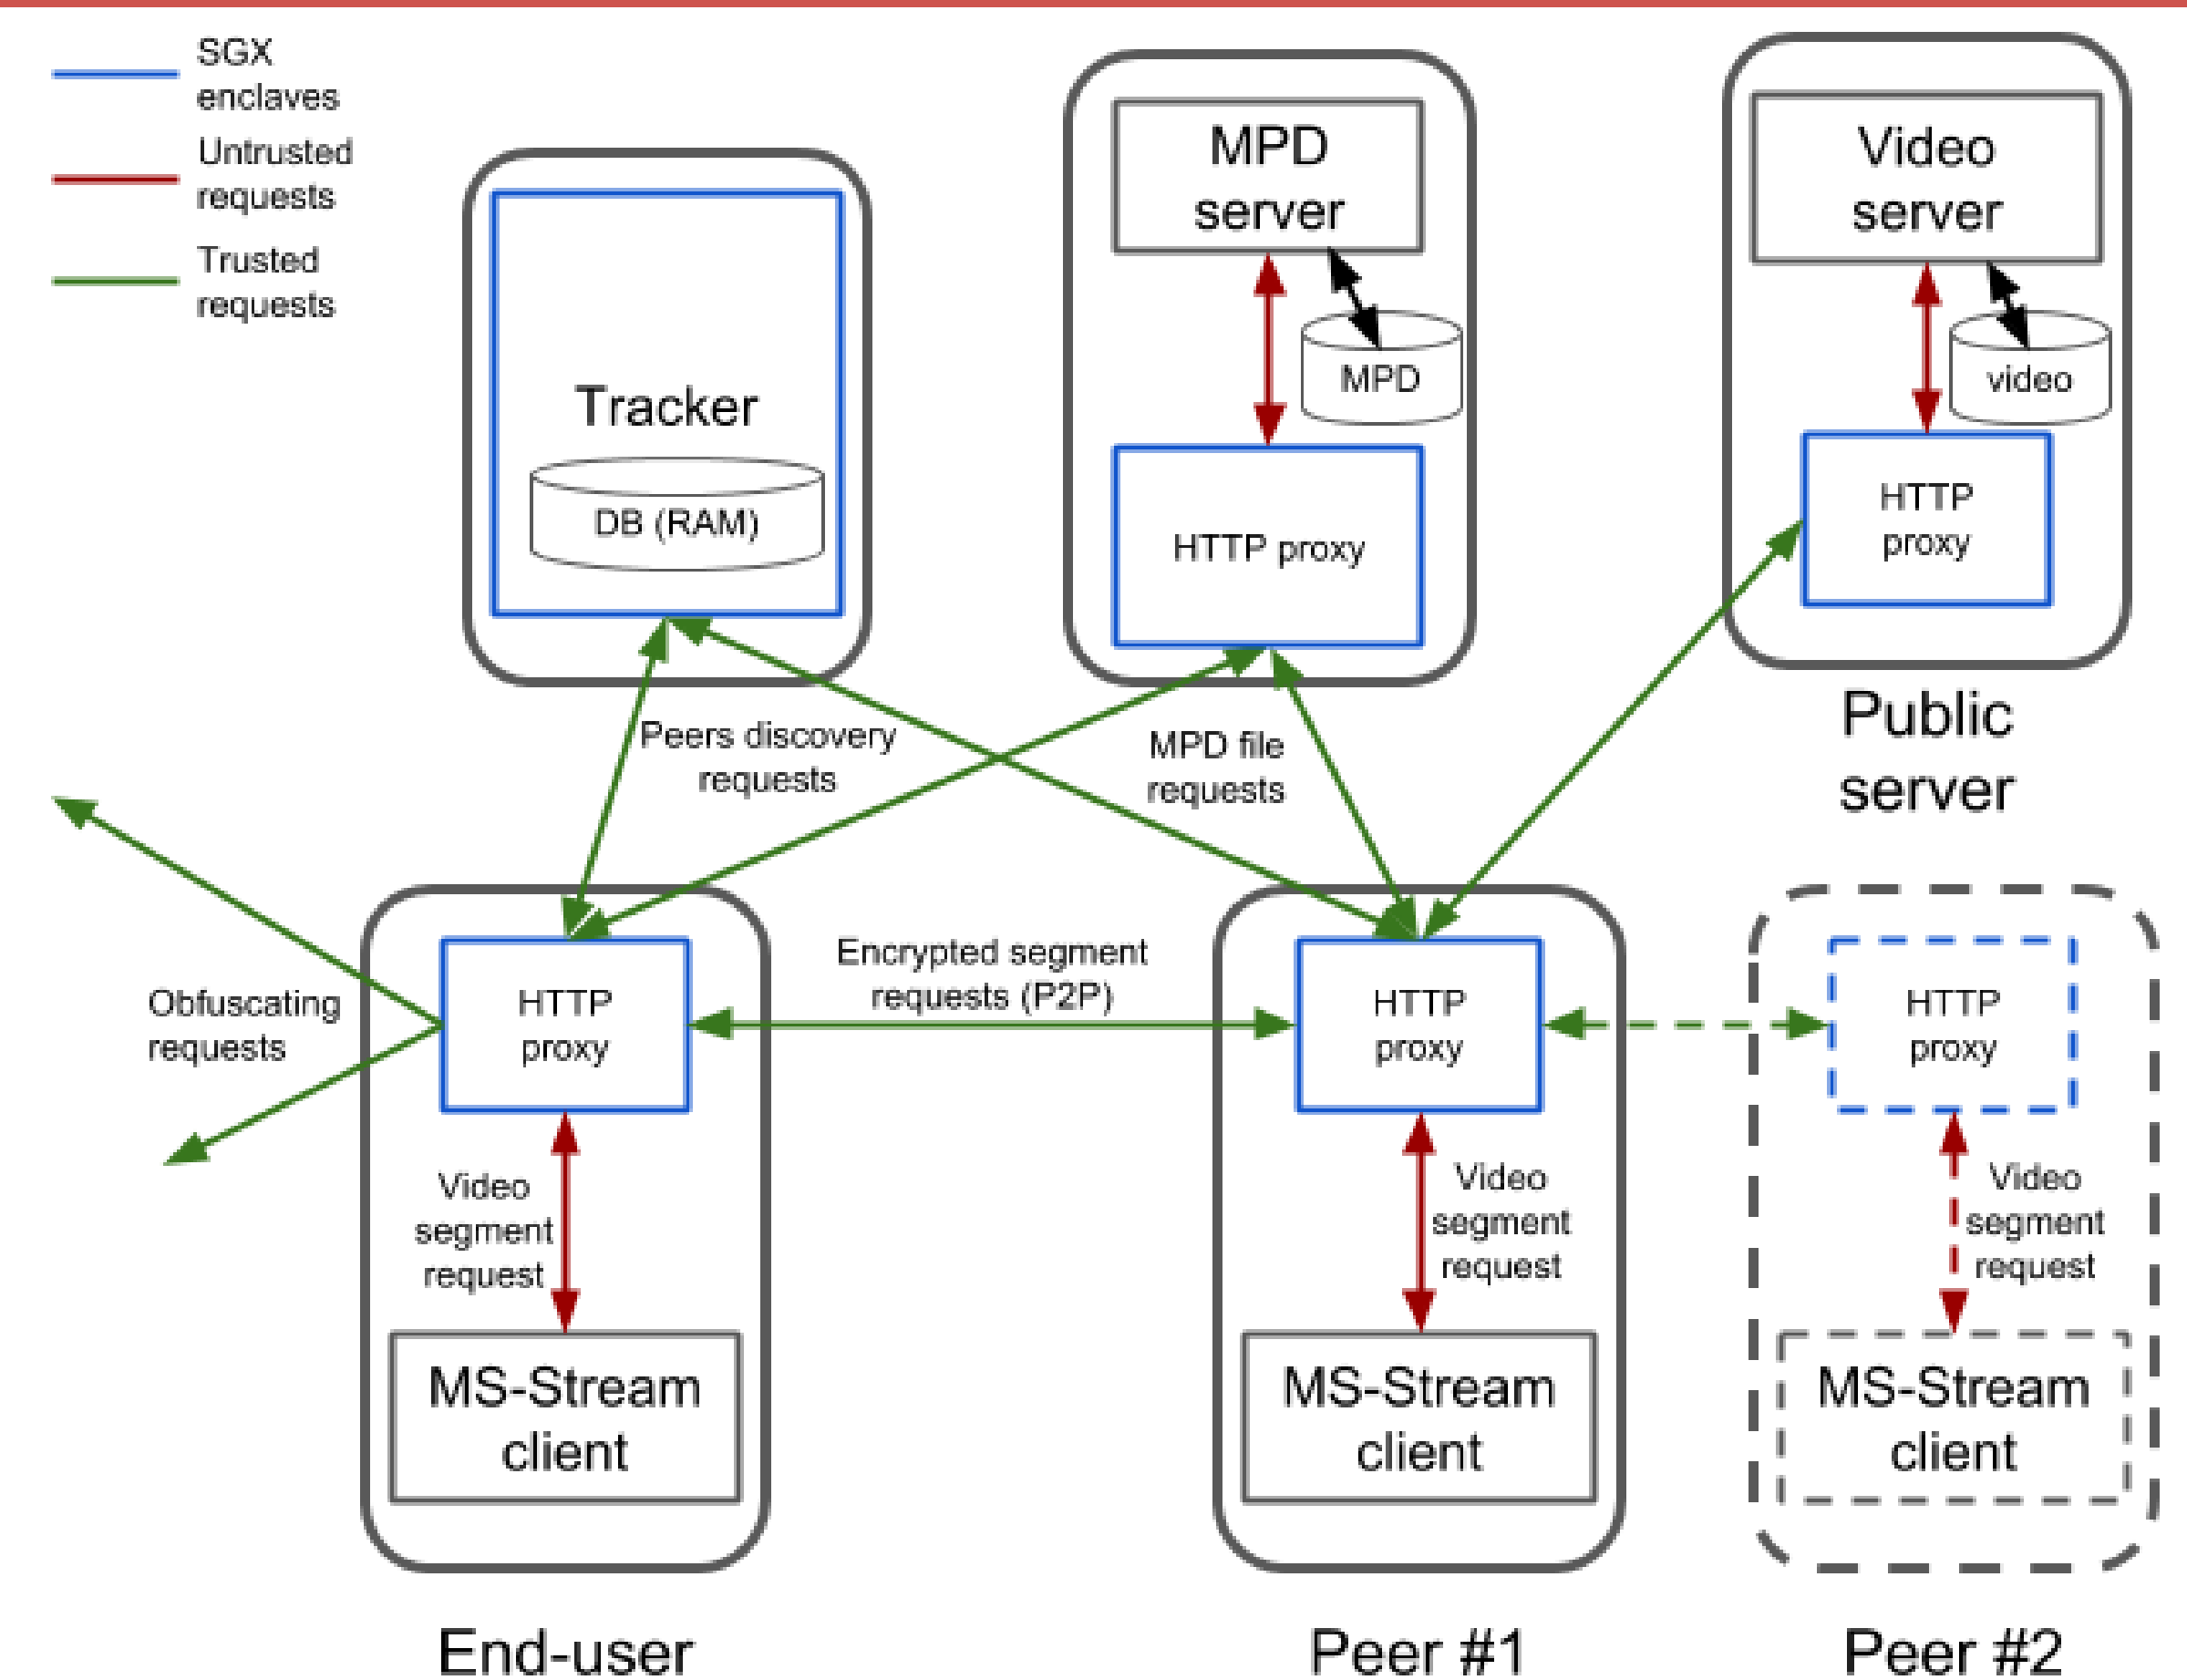

PRIVA-STREAM idea

- Reliability, QoE and scalability
MS-Stream: Multiple-Source adaptive streaming over HTTP
- Incentive to contribute
Rewarding: contributing users get a higher quality
- End-users privacy
TEE (SGX): encryption, NAT and anonymity

PRIVA-STREAM overview

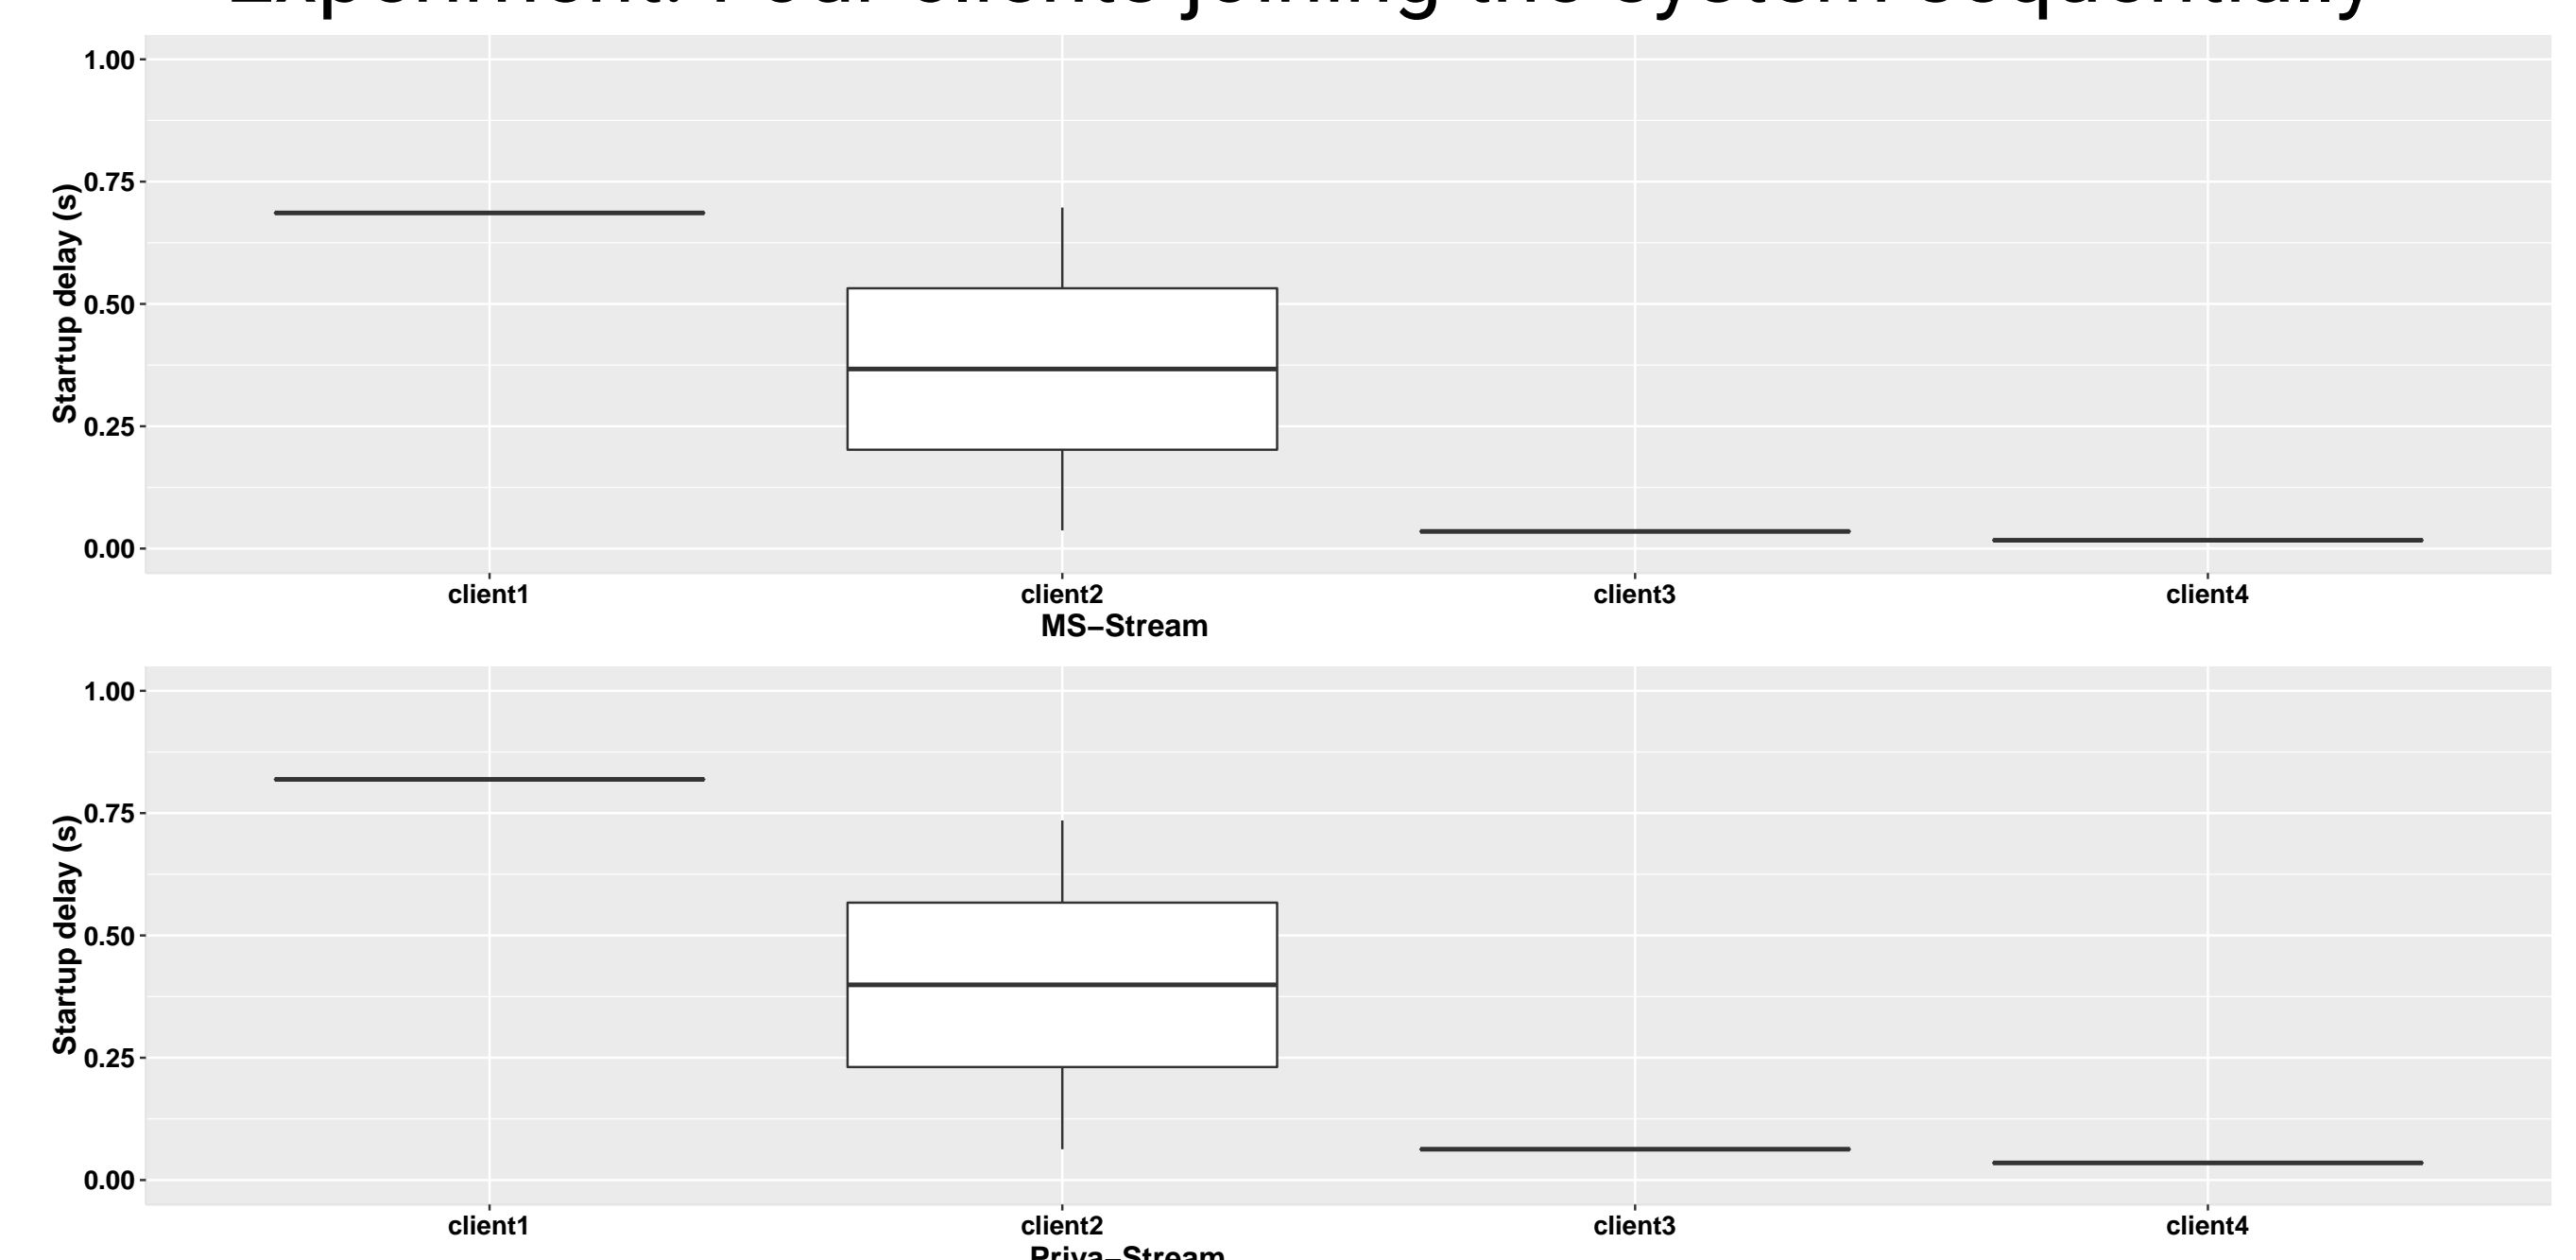

PRIVA-STREAM technical description

PRIVA-STREAM early results

Experiment: Four clients joining the system sequentially
