

## Video content consumption

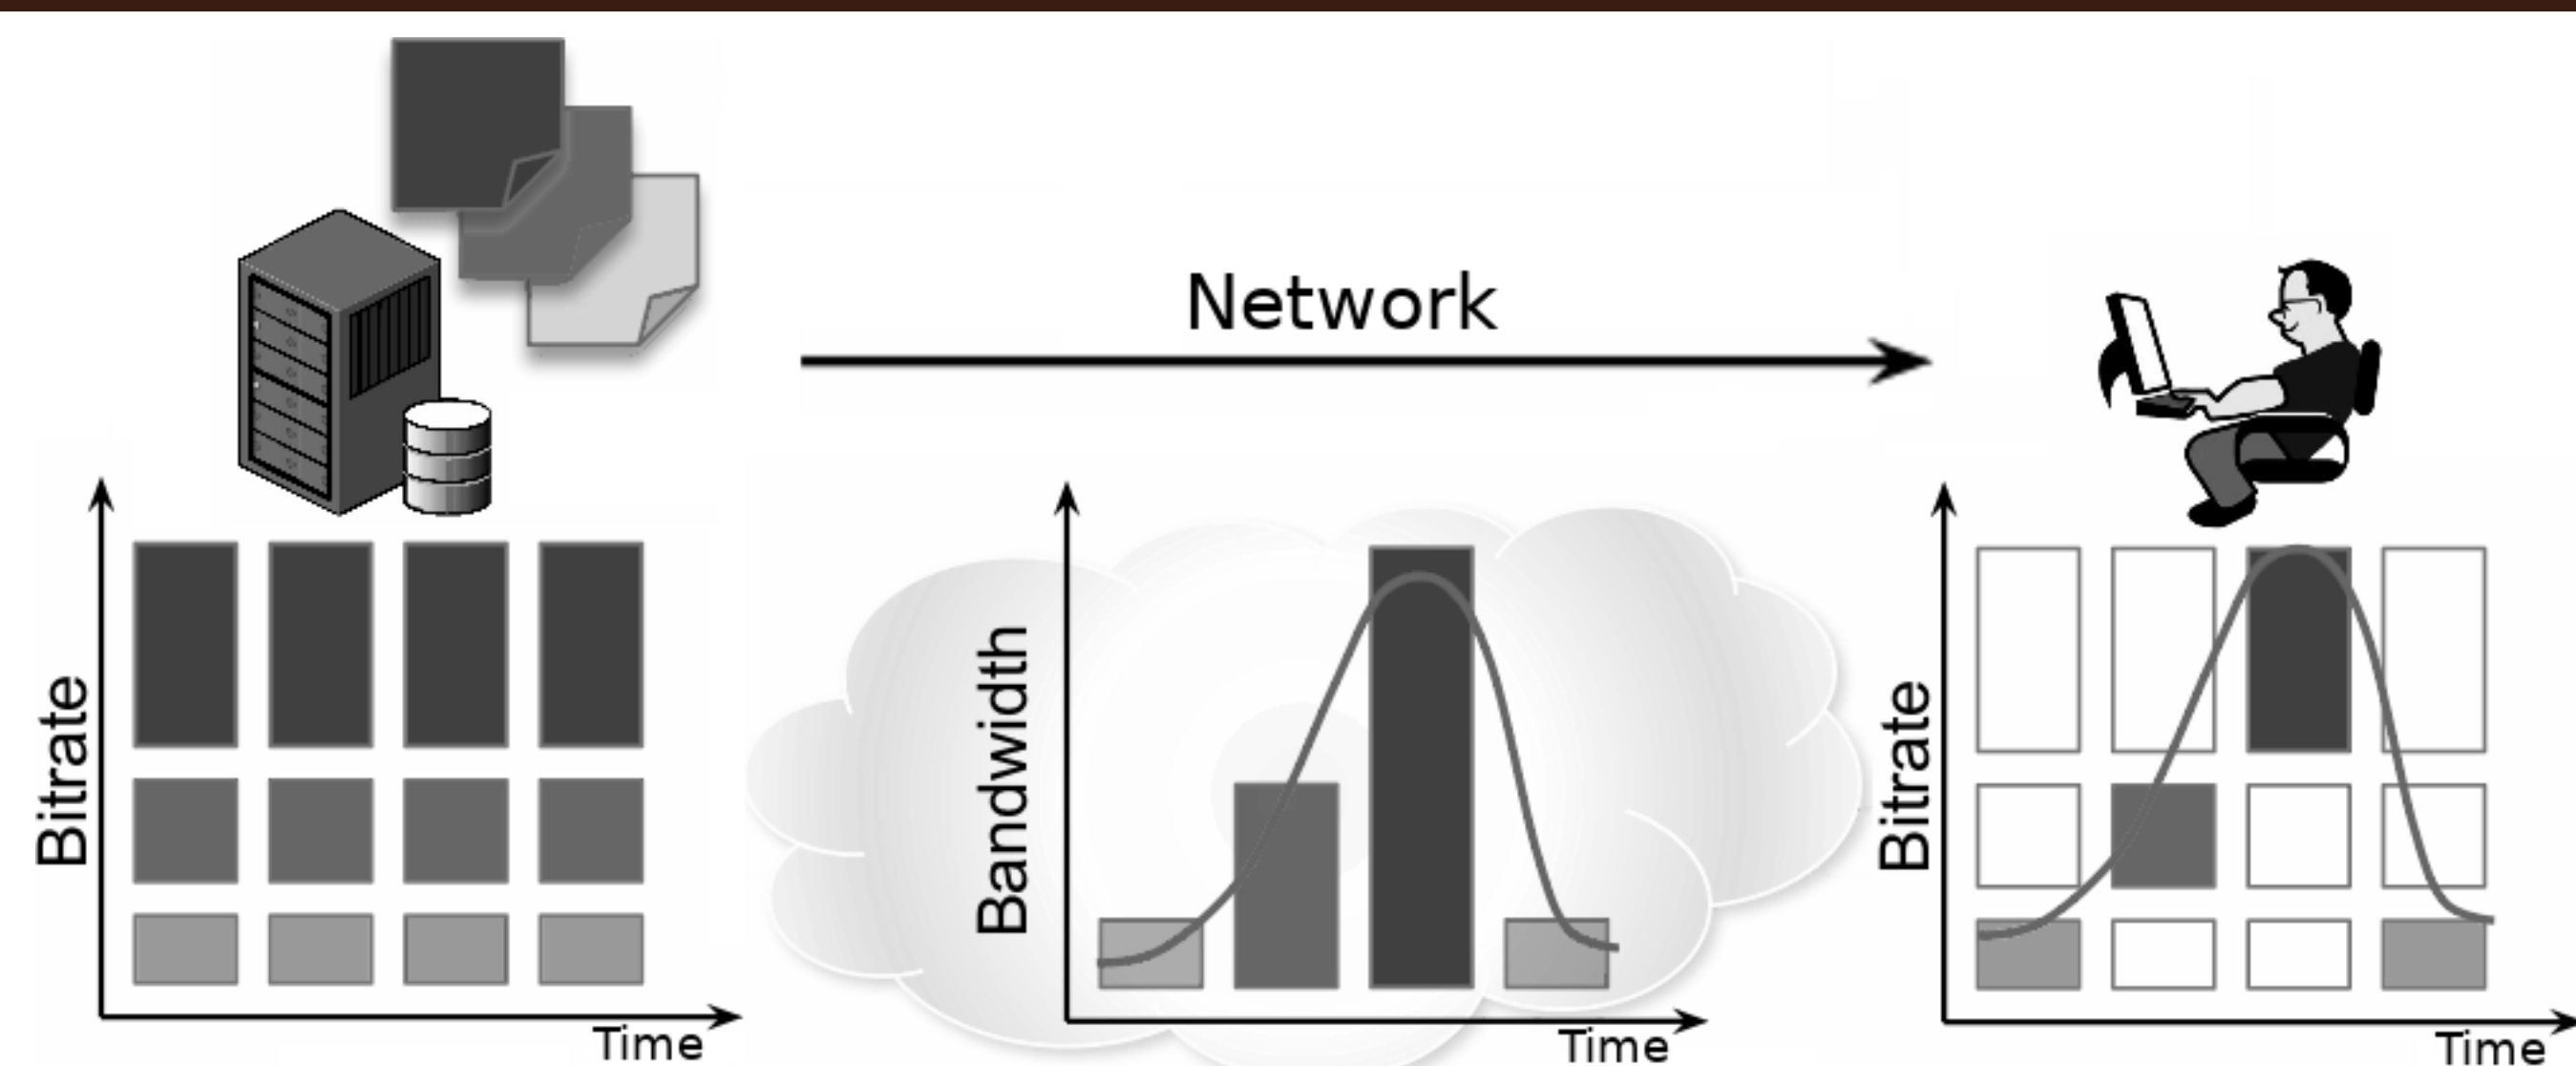

24% CAGR  
2016-2021

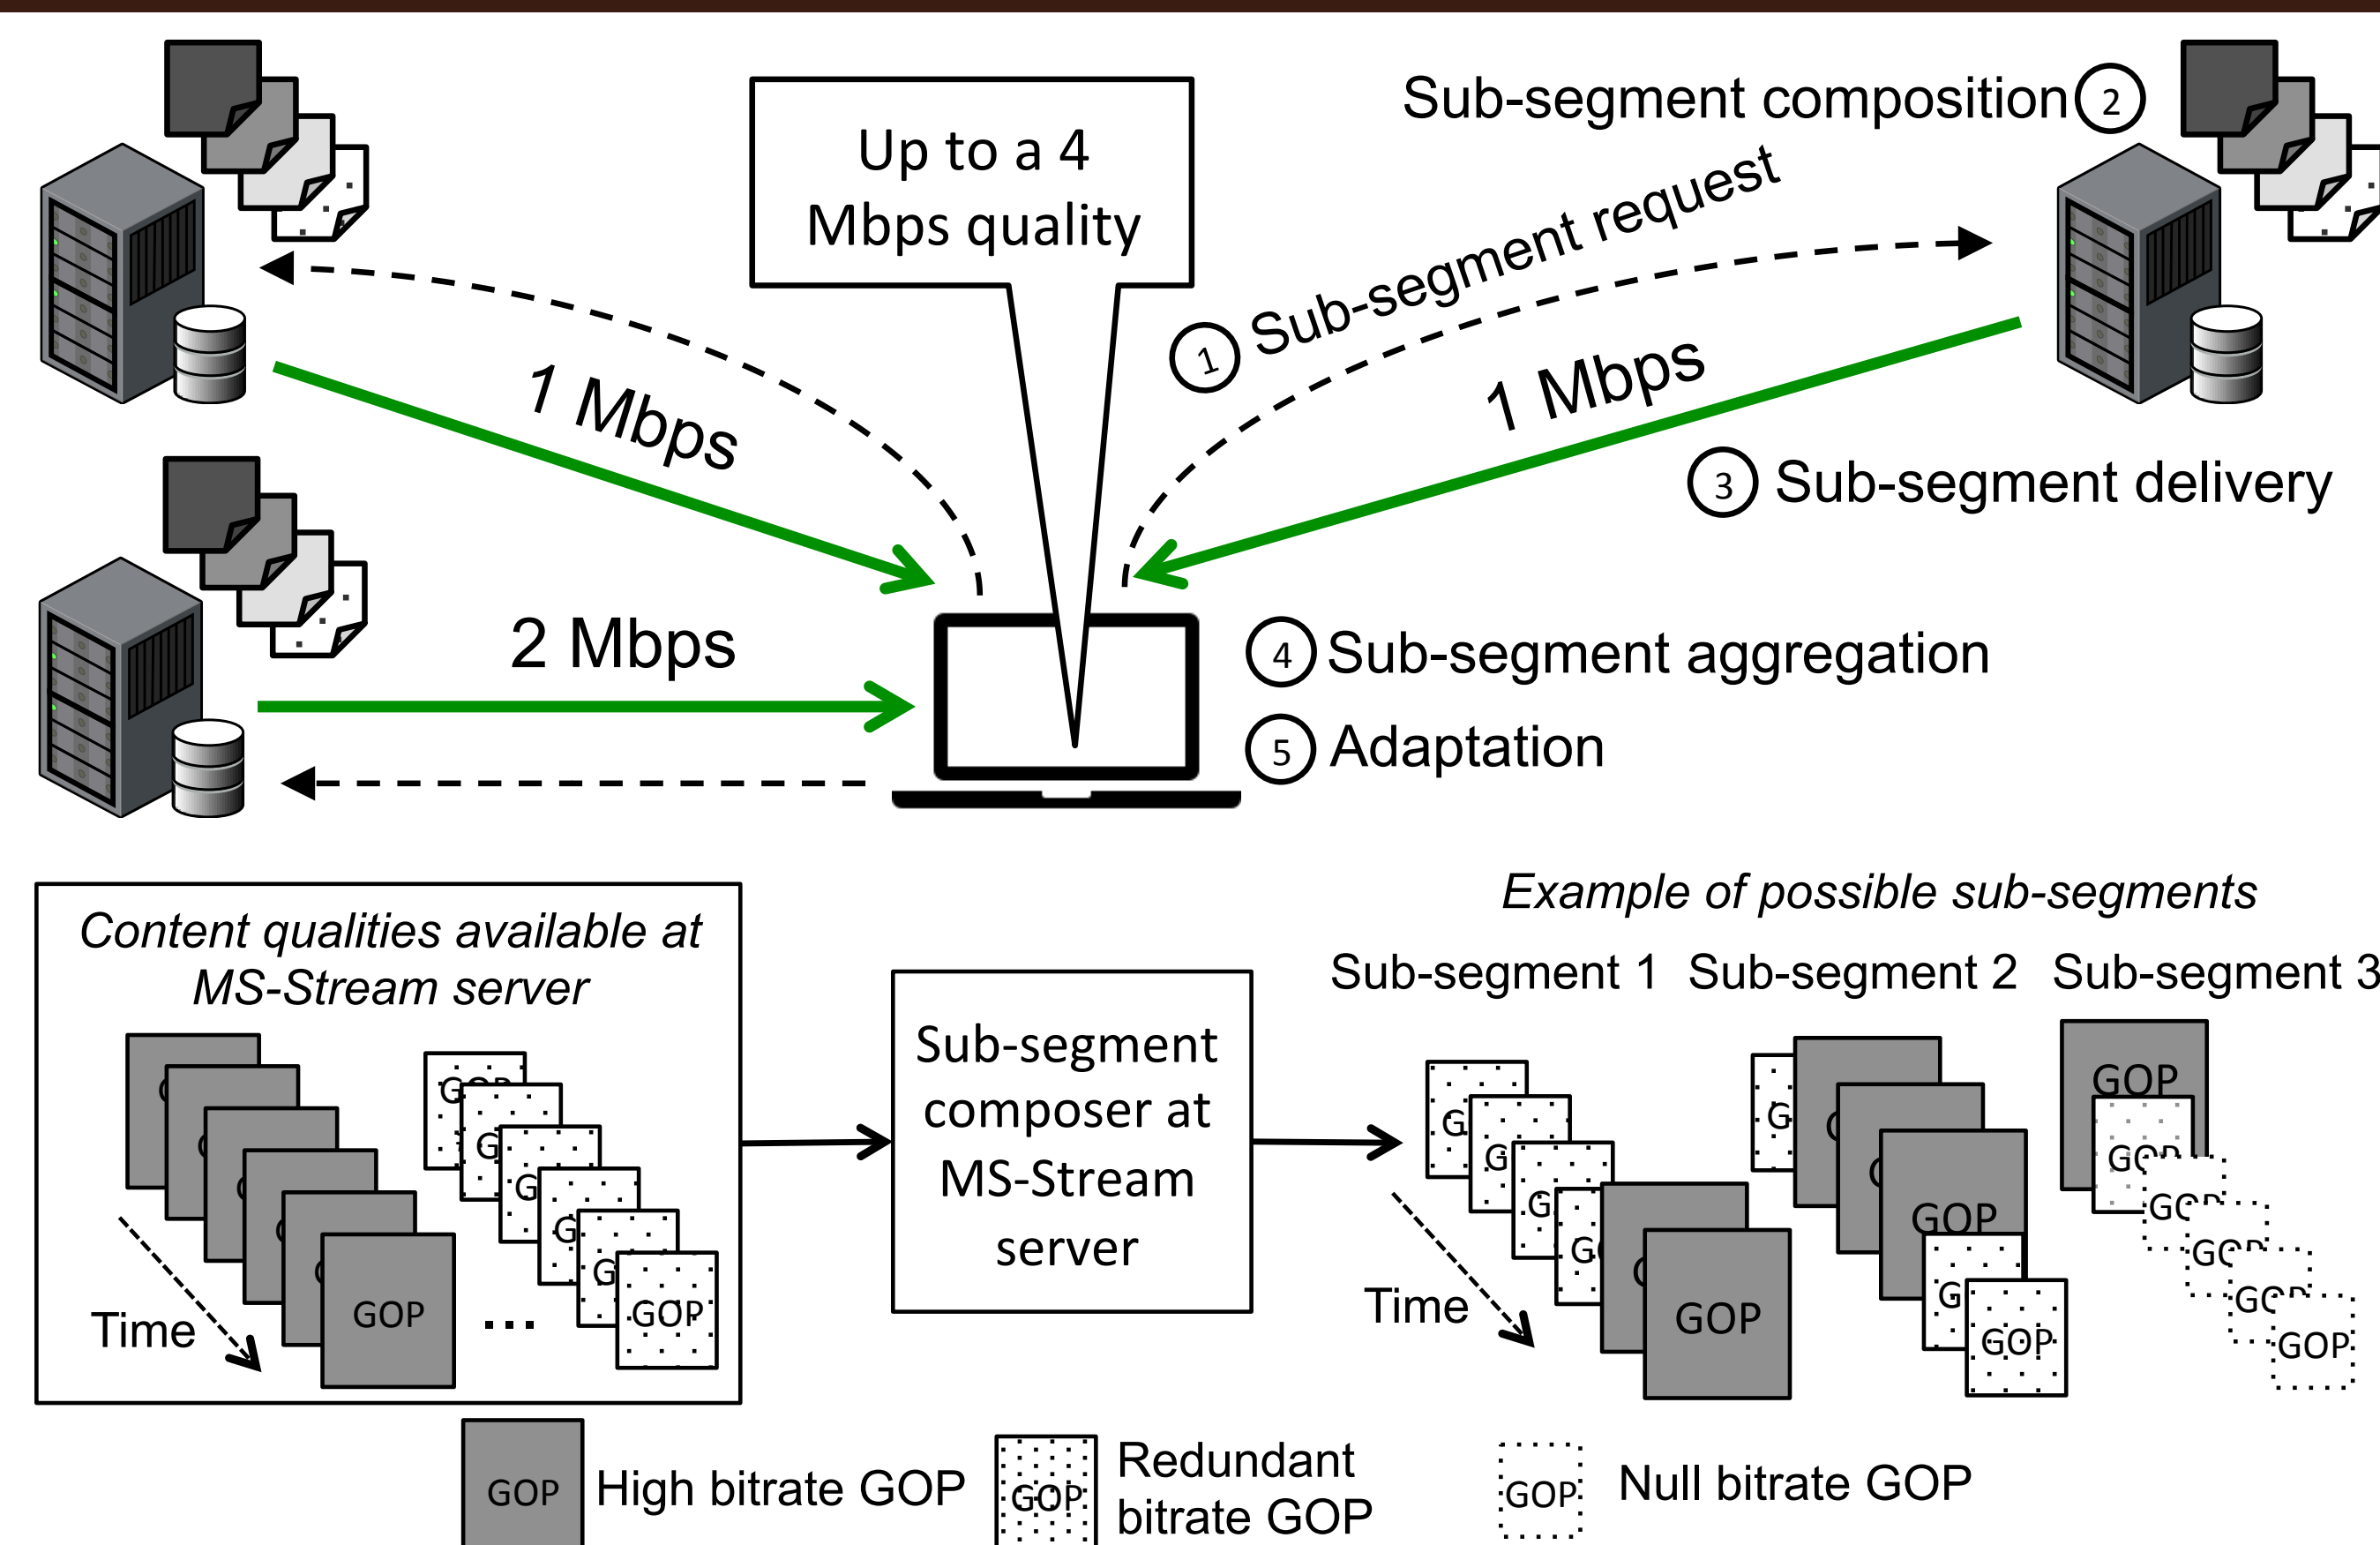

## Content Delivery Networks (CDN)

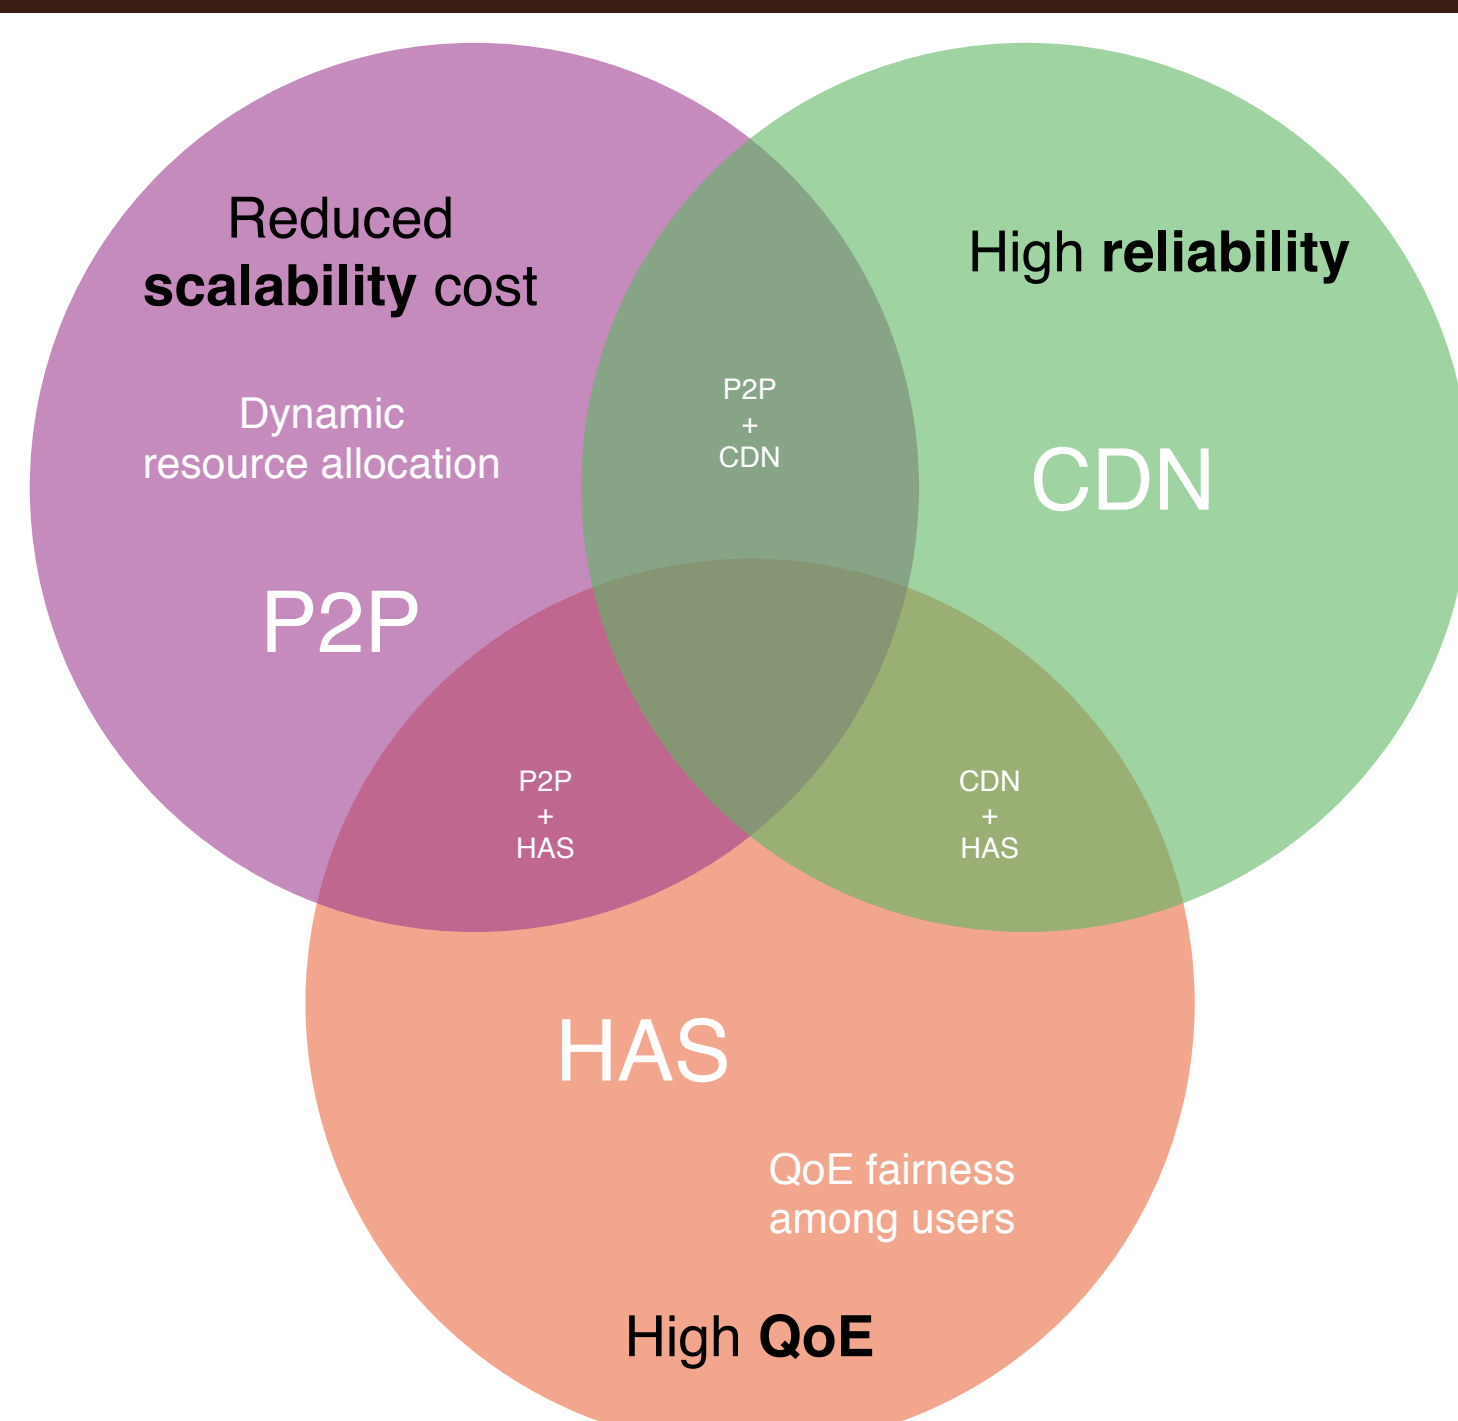

## HTTP Adaptive Streaming (HAS)

## MS-Stream: Multi-Source Streaming over HTTP

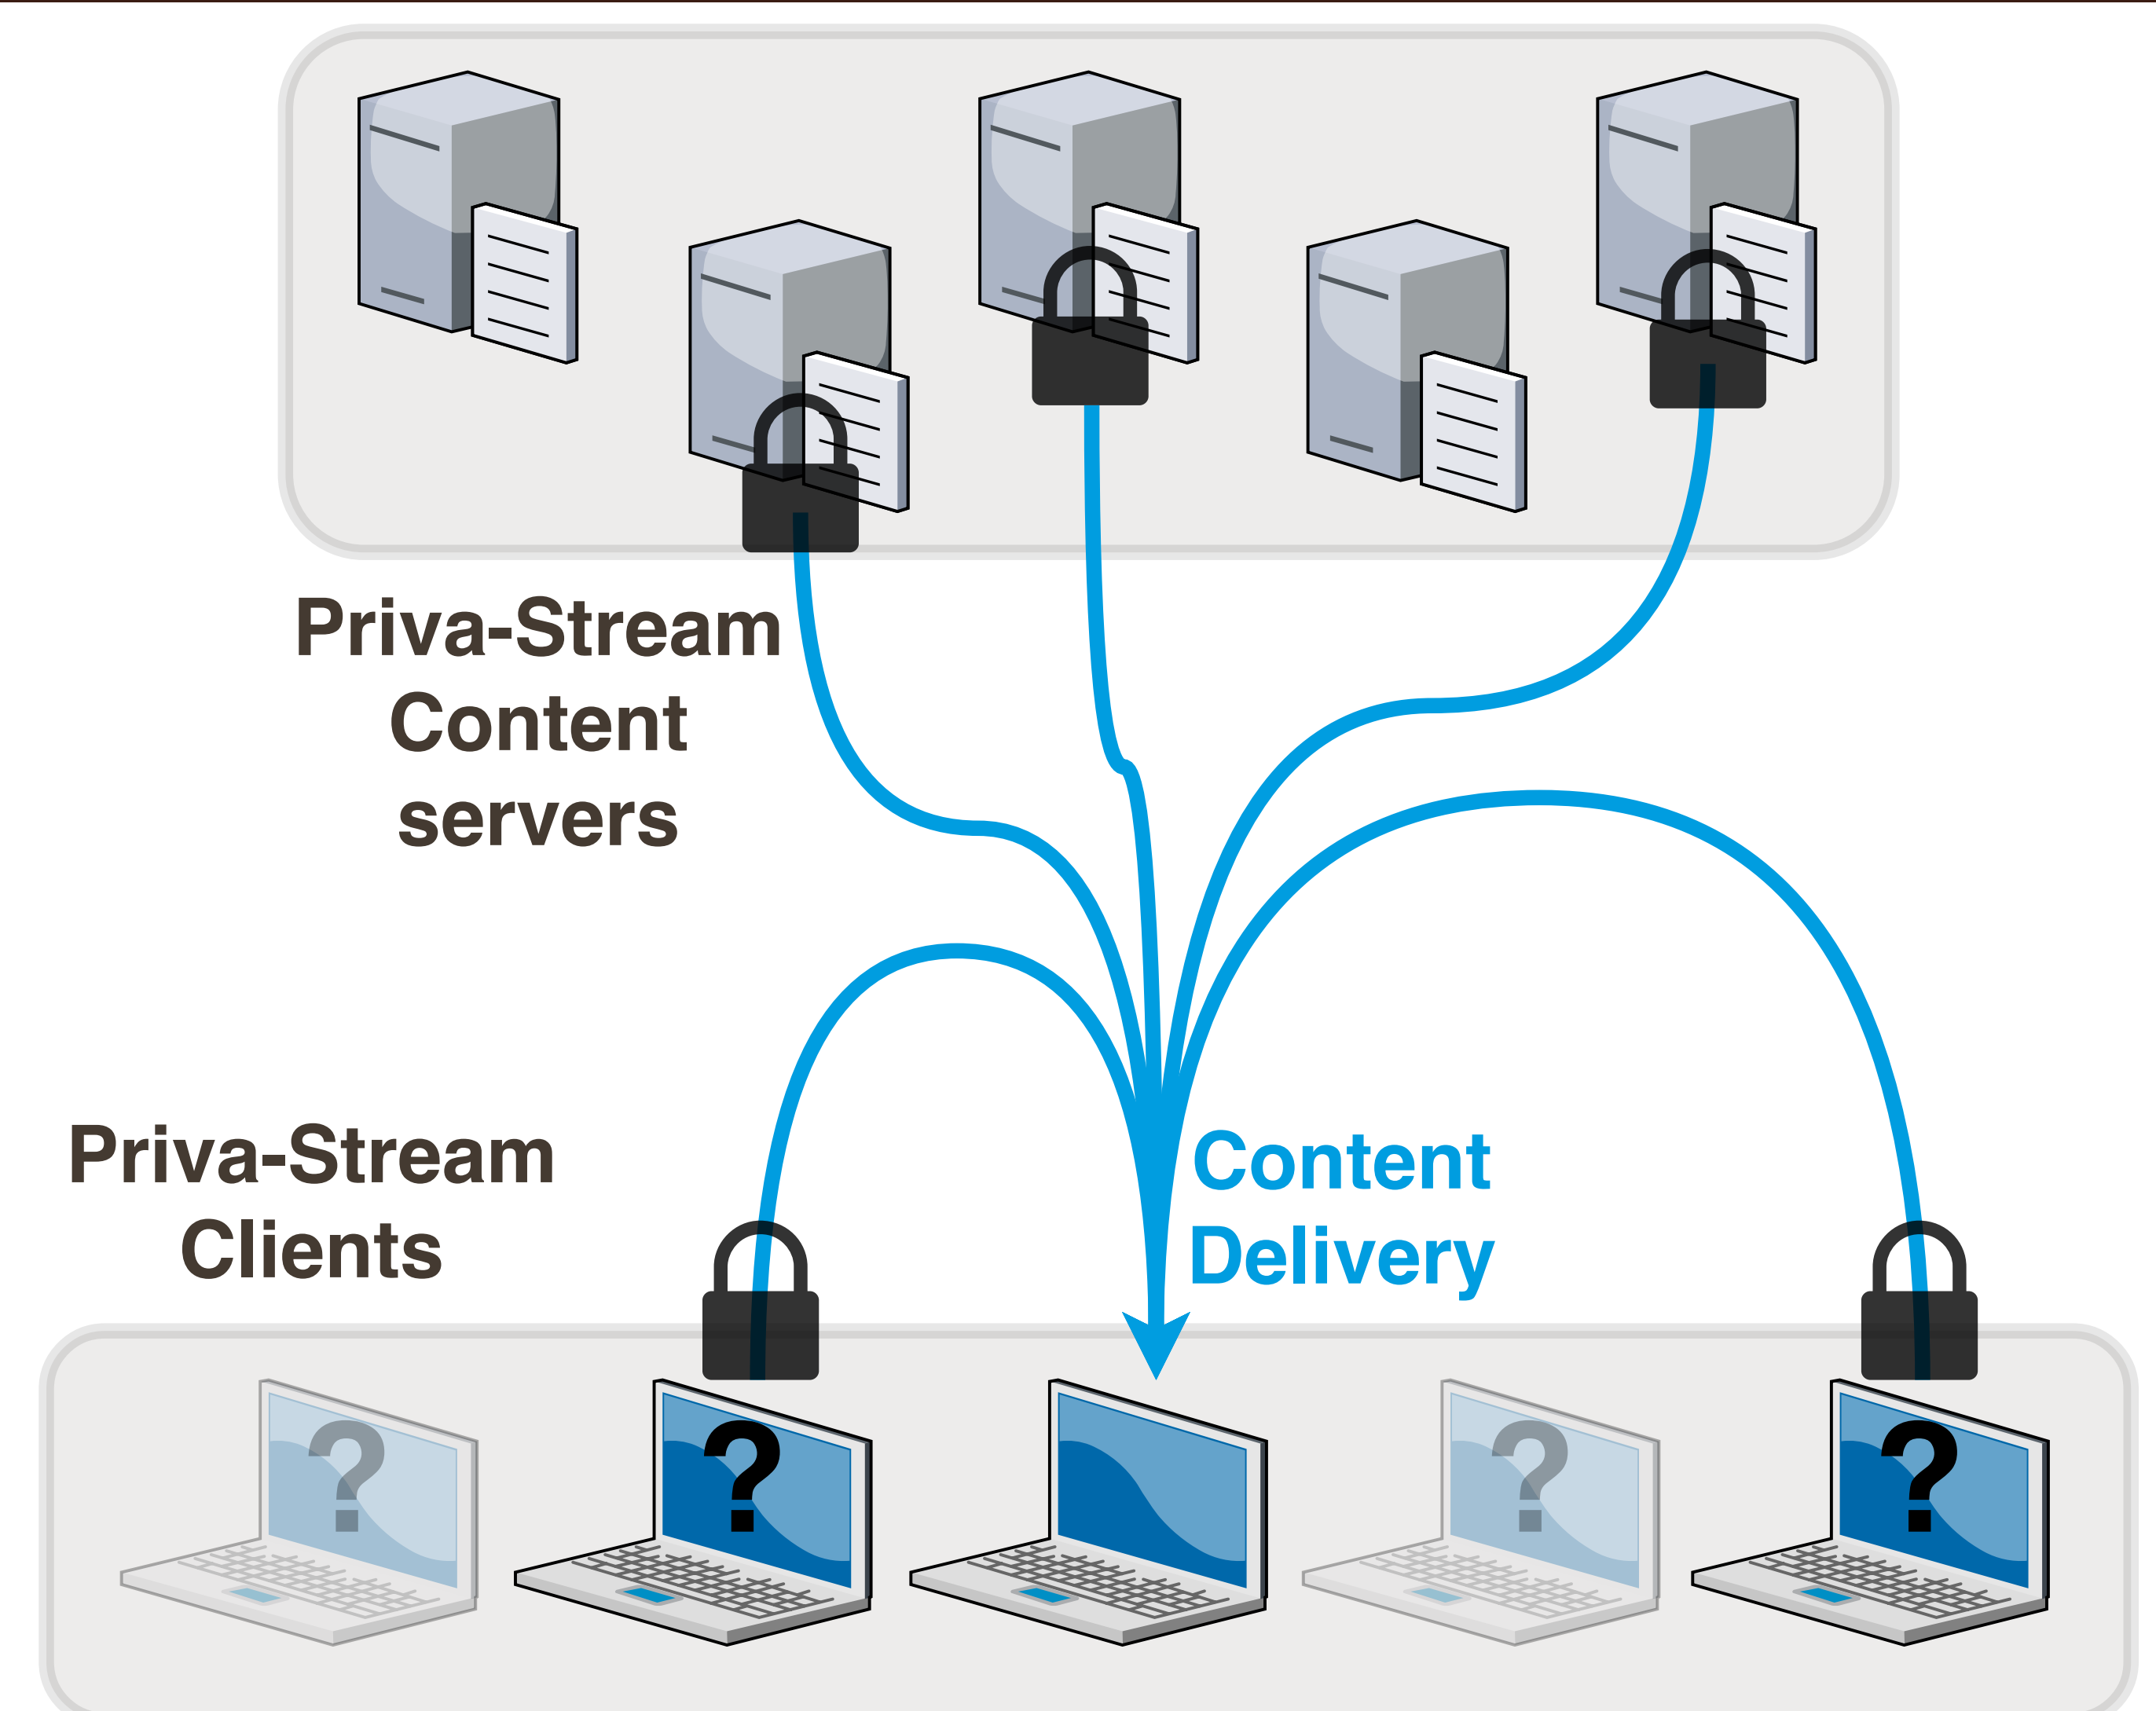

## Problem statement

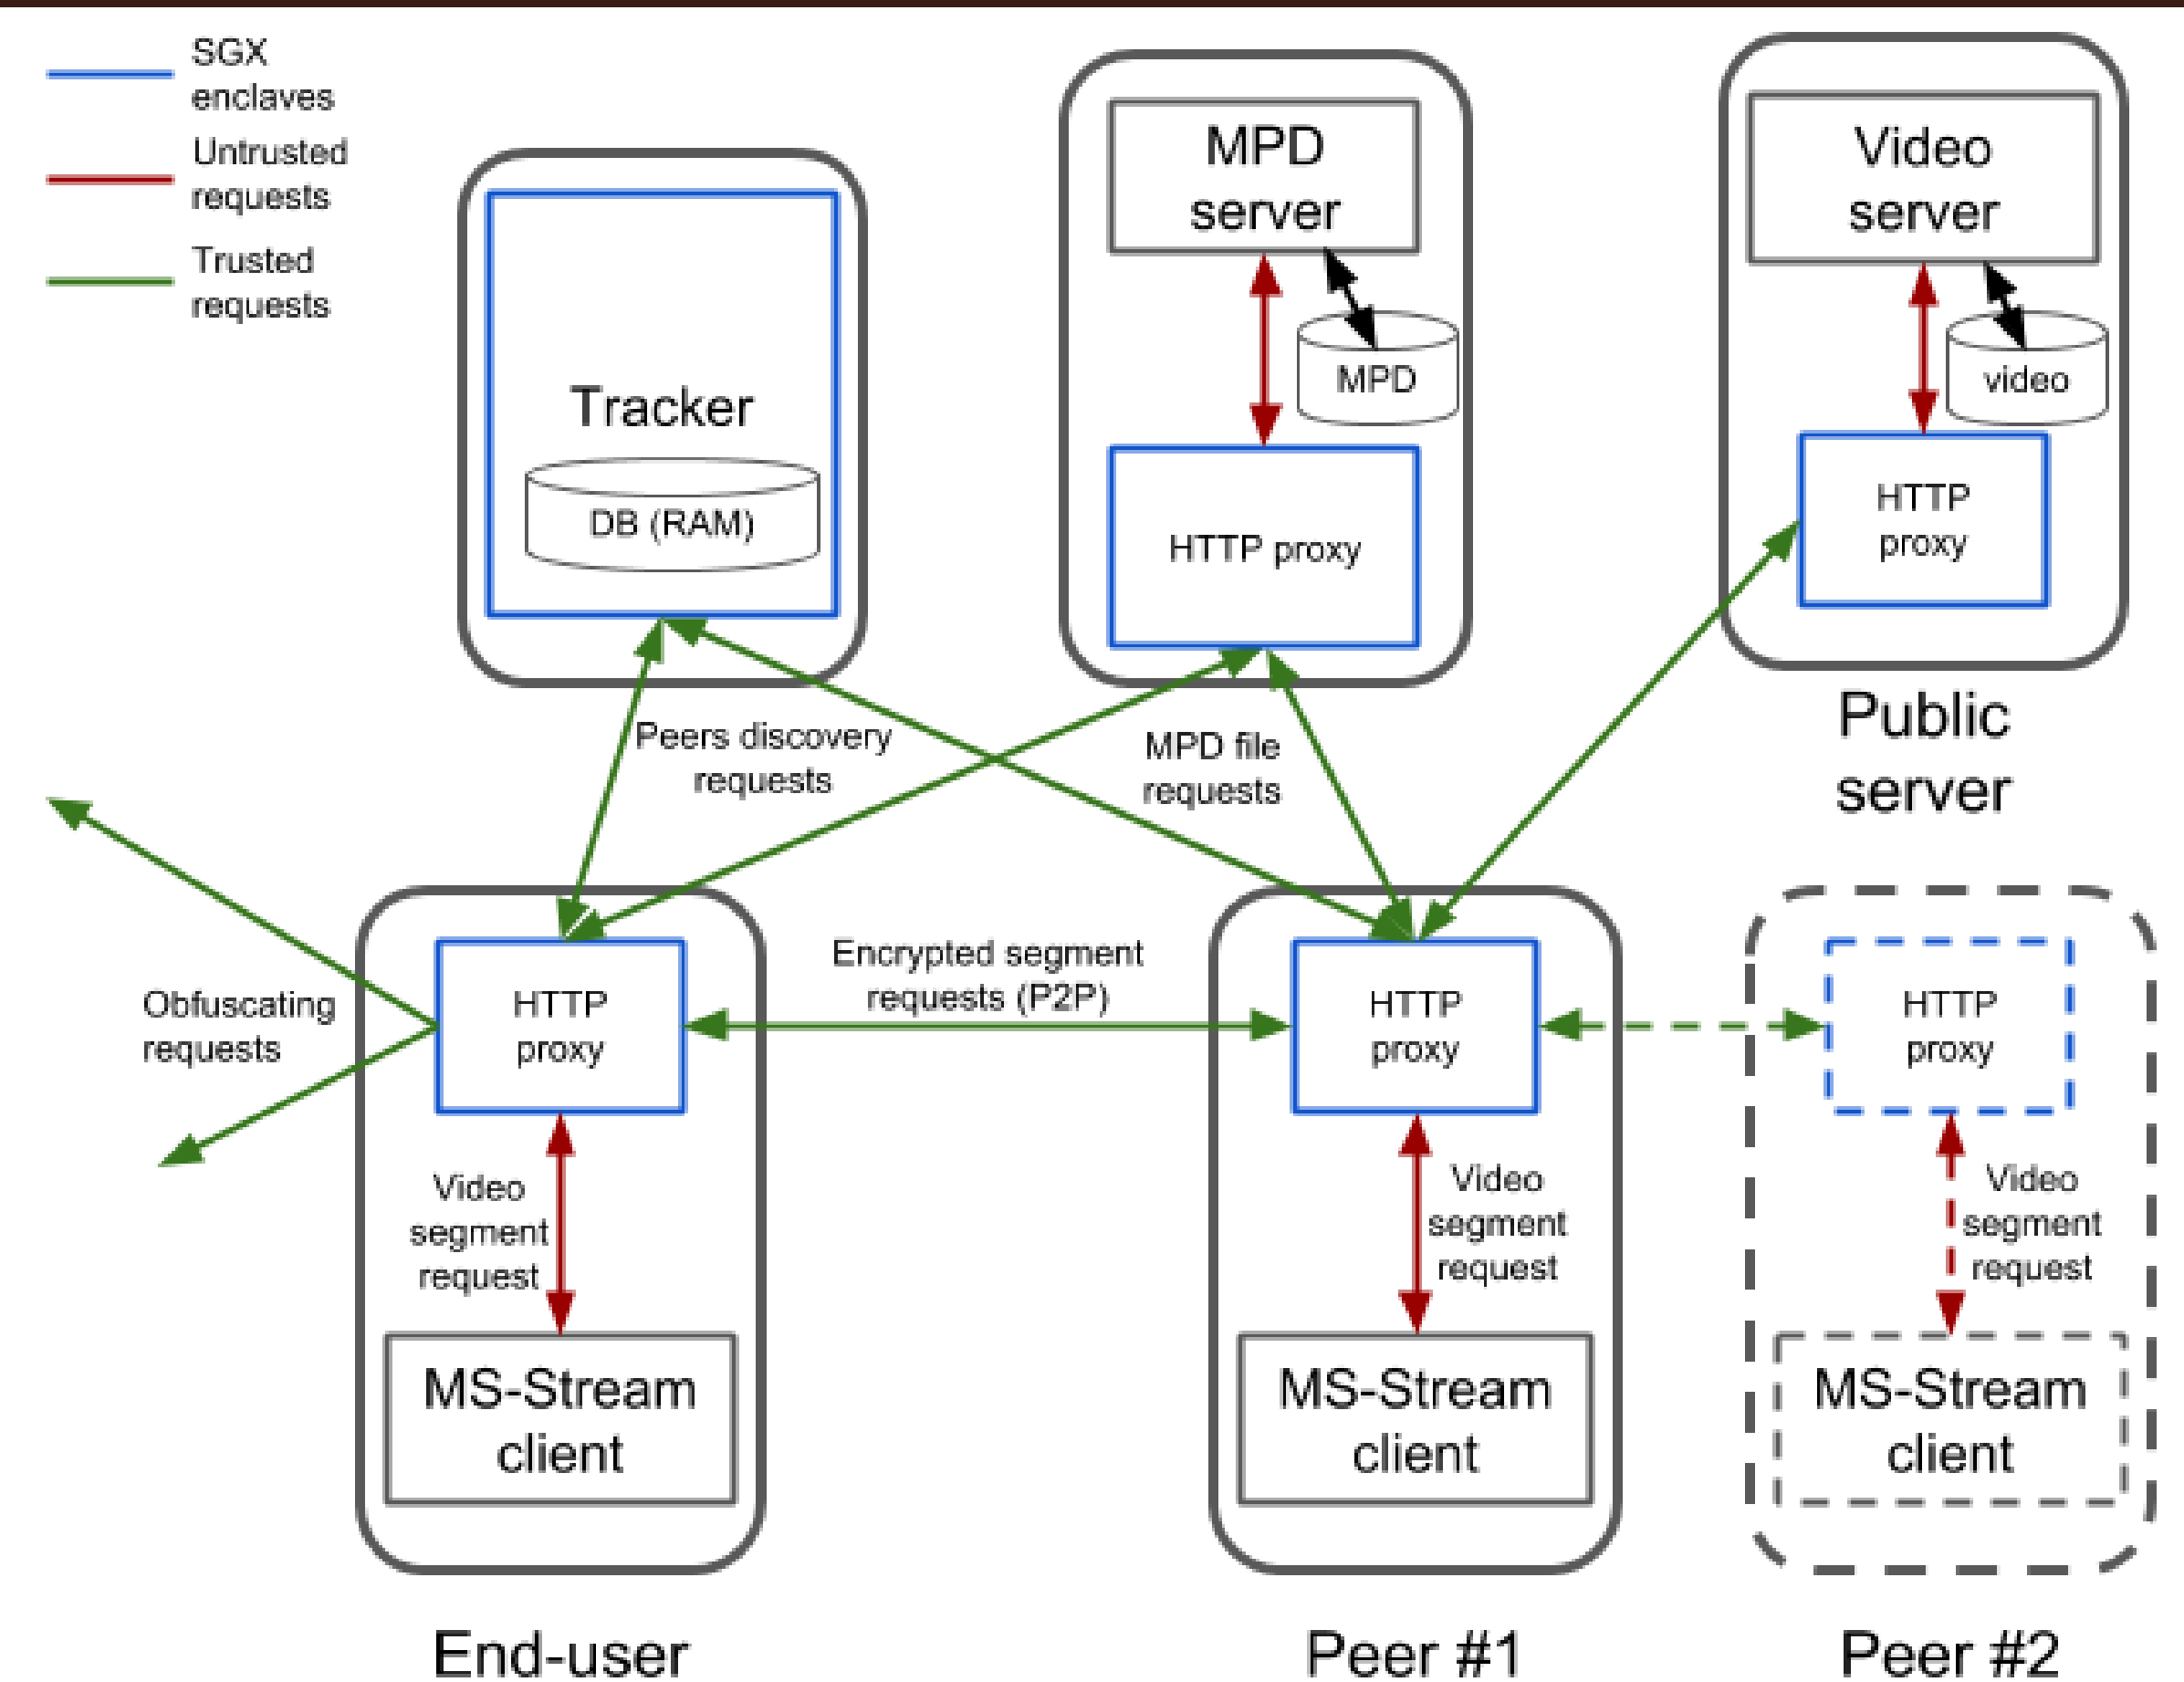

## PRIVA-STREAM idea

- Reliability, QoE and scalability
- MS-Stream: Multiple-Source adaptive streaming over HTTP
- Incentive to contribute
- Rewarding: contributing users get a higher quality
- End-users privacy
- TEE (SGX): encryption, NAT and anonymity

## PRIVA-STREAM overview

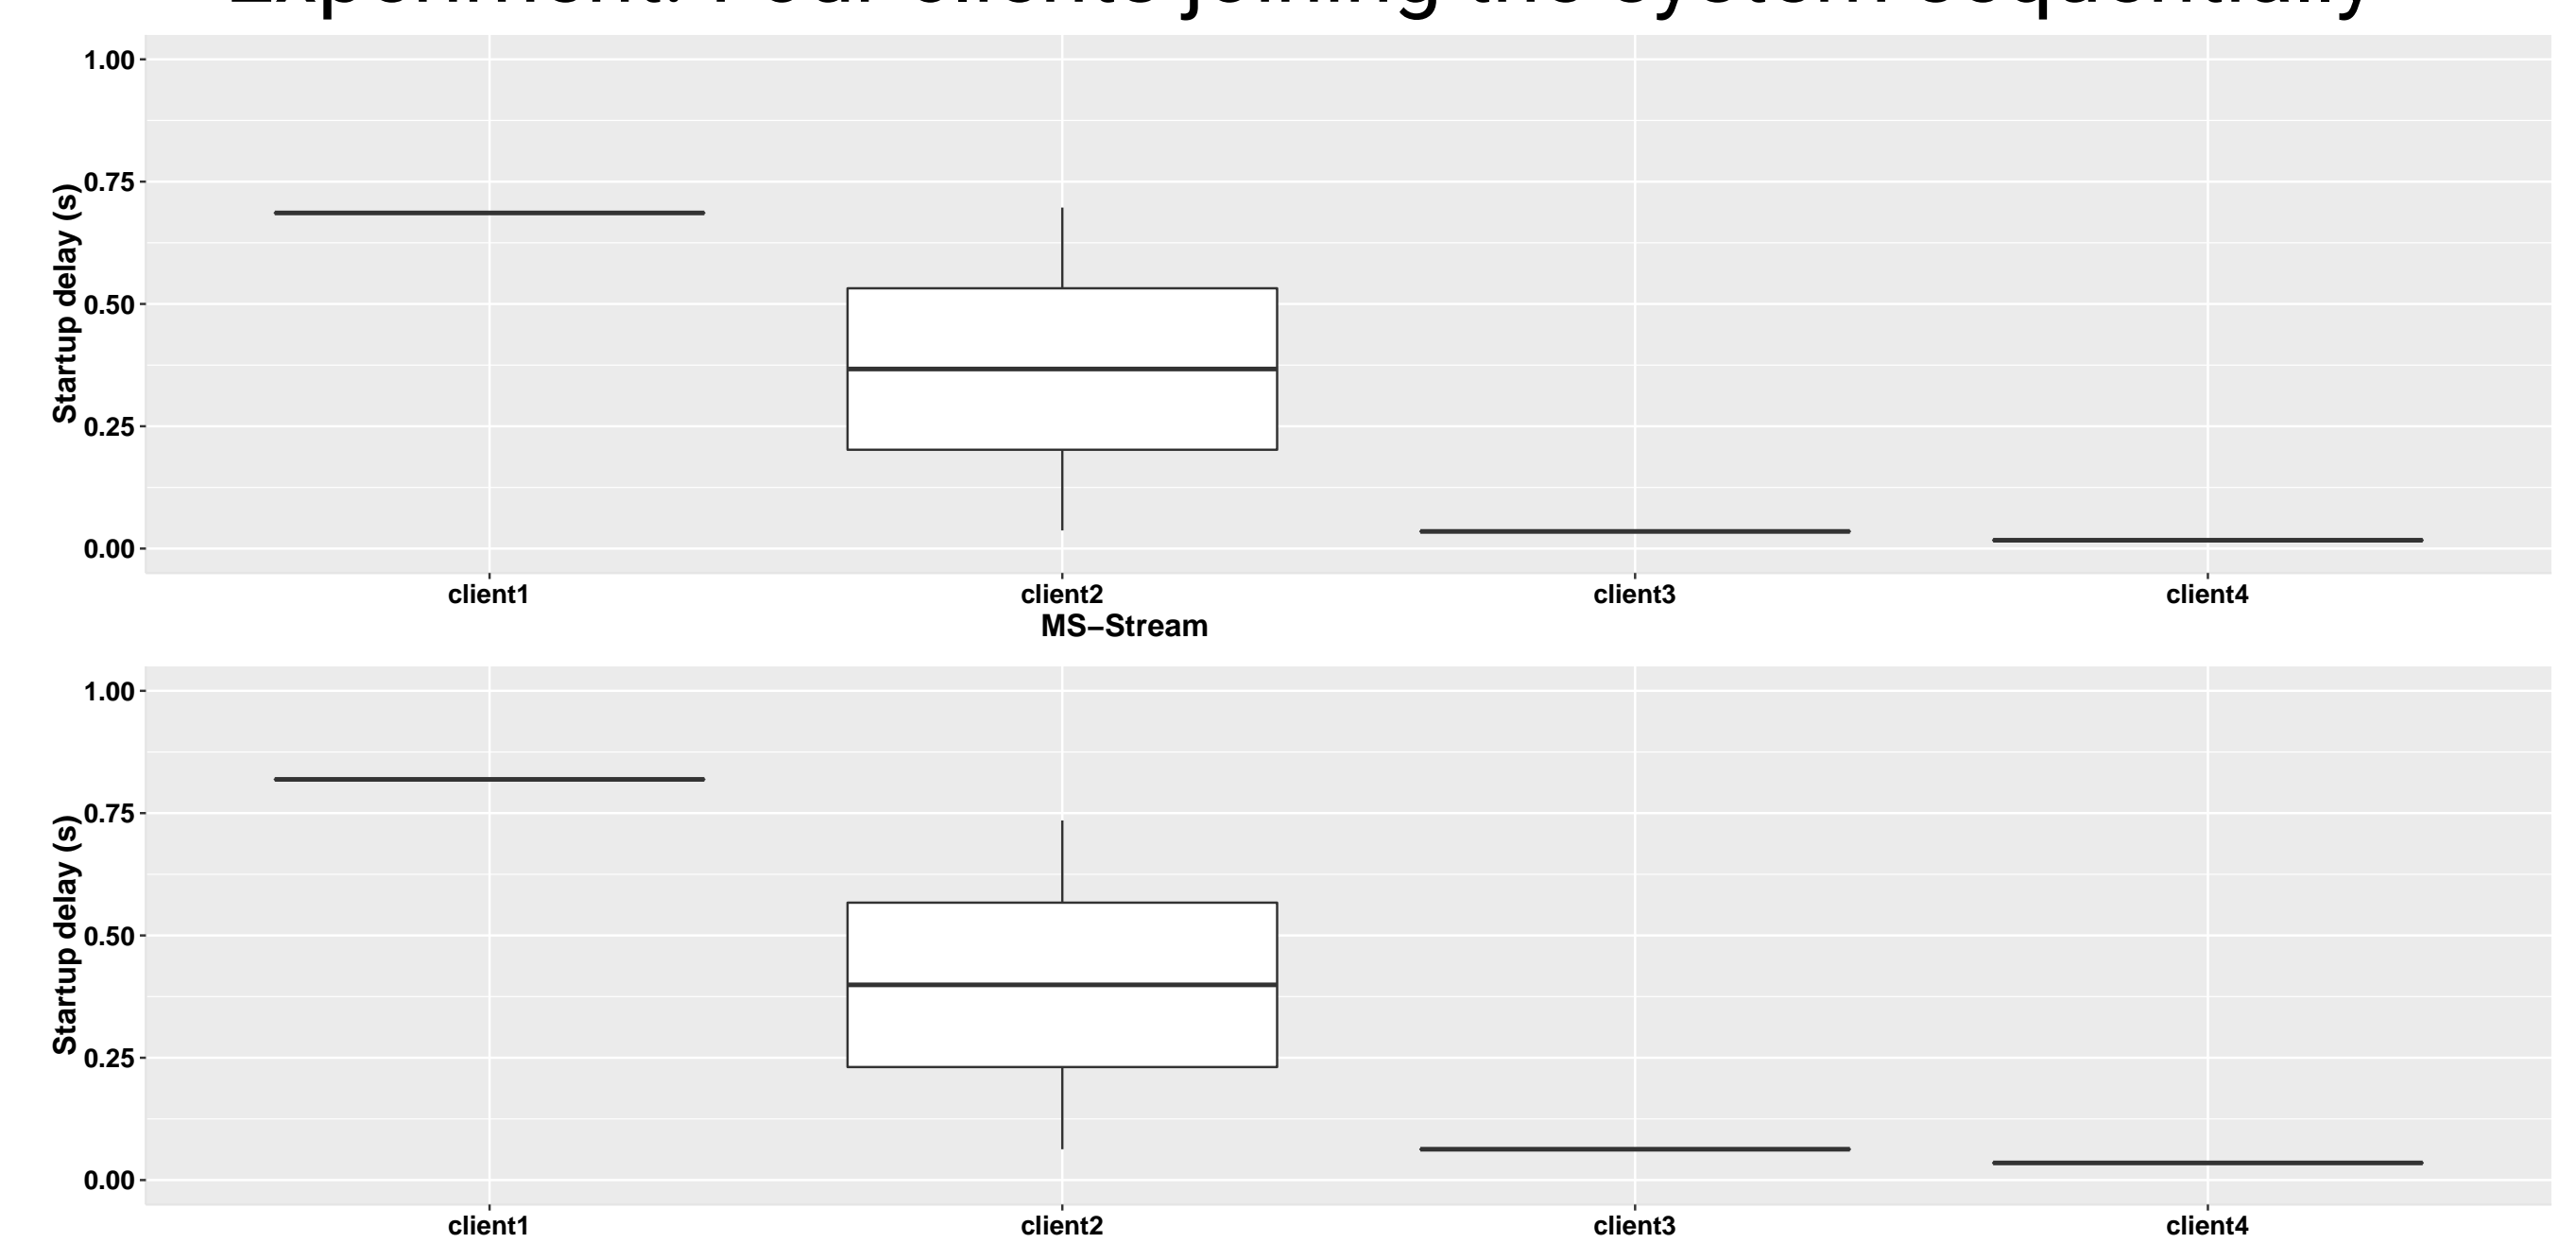

## PRIVA-STREAM technical description

## PRIVA-STREAM early results

Experiment: Four clients joining the system sequentially

Startup delay (s) - MS-Stream (top) vs PRIVA-STREAM (bottom)
